

Wet Continuous Rim Diamond Blades

SLTILE10 \$59.90

10" TILE SLAYER SUPREME WET TILE BLADE

The **10" Tile Slayer** is an inexpensive blade that cuts everything! This supreme wet cutting continuous rim diamond blade is made for cutting porcelain, granite, marble and ceramic tile. This blade is designed with a soft bond so it cuts freely with no slowdown or glazing effect when cutting hard materials. With a 10mm tall mega-rim, this blade will give you the cheapest cost per cut.

Slayer - for Killer performance!

10" DISCO "TSUPER TSUNAMI"

TSU10 \$64.90

Traditional style blade made for fast aggressive cuts on porcelain. From **Disco®**; well known in the stone industry. Super-high rim made exclusively for our customers.

- 10mm High Rim
- Supreme Grade
- Great For Porcelain

MK 225 HOT DOG BLADES

Item #	Size	
2507HD	7"	\$38.50
2510HD	10"	\$49.90

This is the aggressive cutting blade with the laser slots that **MK Diamond®** is famous for. It is excellent on all materials, including porcelain.

- Low Tension Rim
- Laser Ported
- Supreme Grade

The **Montolit SCX** series supreme blades with DNA technology are excellent for cutting porcelain and natural stone. This segmented blade provides better cooling and cleaning for an improved cut. For wet use only, the **SCX** blade is considered to be one of the best diamond blades ever produced by **Montolit**.

The patented DNA technology positions the diamond at the best possible angle to the blade. This greatly increases the cutting capacity, with a performance sometimes 100% higher than that of similar blades. Thanks to these specific characteristics, the **SCX** diamond blade is now one of the few available on the market able to cut very hard and thick porcelain tile up to 1 3/16". Comes with adapters for most electric

Excellent for cutting:

- Porcelain
- Quartzite
- Granite

SCX250 \$166.95

DIAMANTE ITALIA®

These high performance blades are designed for chip-free cutting of ceramic tile, marble, granite and porcelain. Since their name is synonymous with quality, you will get great value from these blades!

Wet Cutting General Purpose Silent Core Diamond Blades

We stock a full line of wet cutting stone blades for the fabricator. Silent core blades use a 3 piece laminated core for reducing noise levels in the shop. These blades are excellent quality, and feature high diamond concentration with the correct bonding. When you want to cut faster and quieter, look no further! Our general purpose blades are designed for cutting granite and quartz engineered stone on a bridge saw.

The One Blade - These bridge saw blades are among the best general purpose blades available for your high-horsepower bridge saw. They use positively aligned diamond segments which allow for quieter operation and fast, clean cuts. There is really nothing made that is better or longer lasting (although, there are a few in the same class). While these blades are capable of performing at a feed rate of up to 200" per minute, for best performance you should find your sweet spot at a recommended rpm between 1,700-2,400. They can be used with all bridge saws that use a 60-50mm arbor.

This is **The One Blade** that you will use to cut all of your granite and engineered stone. **The One Blade** that you can depend on for long life. It is **The One Blade** that, when it wears out, you will tell your purchaser to get you **The One Blade** from **DeFusco Industrial Supply**.

FILTER PROJECT

Air-Water System

Automatic Dry Dust Collection Booths

The Filter Project Dry Dust Collector Booth is made to trap 99.99% of Dust from Granite, Marble, Engineered Stone, Quartz, Quartzite, and other airborne particles.

- Traps 99.99% of airborne dust and particles
- Automatic self cleaning system
- Easy to dump dust collection drawers
- Easy ON/OFF buttons
- Easy to use control panel
- 13' has dual motors / 10' has single motor
- Comes with a 3 foot extension box for focused suction
- Comes fully assembled; just connect to power

Wet Cutting Diamond Blades for Porcelain, Dekton & UCS Materials

the **Dongsin Diaflx** Keramicut-S silent core blade gives consistently clean cuts and long life when used for cutting porcelain and UCS materials. This Korean made blade utilizes a special bond which will help prevent chipping while still cutting at a fast rate. This blade is excellent for all saws, especially saws with a horsepower of 25hp or more.

Item #	Size	
DS14KERAMICUT-S	14"	\$315
DS16KERAMICUT-S	16"	\$325

These segmented diamond blades from **Tenax** give consistently clean cuts and long life when used for cutting Dekton as well as other UCS materials. They utilize a special bond to help prevent chipping while still cutting at a fast rate. Another high quality product made by **Tenax**.

Item #	Size	
TEDEK14	14"	\$249.90
TEDEK16	16"	\$299.90

The **Tenax Ceramic** blades are perfect for cutting large format porcelain. They give fast, chip-free cuts even when mitering. SFA tested at the workshops with stellar results! These blades work great on bridge saws and give great cuts and long life on high hp saws. They are among the best cutting and longest lasting blades for porcelain.

Item #	Size	
TECER14	14"	\$229.90
TECER16	16"	\$289.90
TECER16XXL	16"	\$389.90

This 14" x 60/50mm x 40mm thick milling wheel is for milling or leveling a concrete table. This steel core wheel will give you long life.

MW1440 \$599.90

The **Cyclone** ULTRA silent core blade is a bridge saw blade for cutting porcelain tile, glass, and ultra compact materials. It features a new bond and high diamond concentration to make cuts fast and chip free. The new reinforced core allows for stable miter cuts. This blade is designed for use on sintered stone and porcelain panels

Item #	Size	
CUSB14	14"	\$229.90
CUSB16	16"	\$269.90

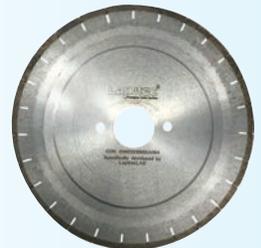

These Dekton silent core blades are made by **ItalDiamant** and are certified and approved by Cosentino for cutting Dekton. They run quietly and give clean chip free cuts on Dekton and other UCS materials. ItalDiamant always has top quality blades!

Item #	Size	
IDDEKTON14	14"	\$239.90
IDDEKTON16	16"	\$279.90
IDDEKTON18	18"	\$369.90

The **Lapitec** blades are excellent for cutting Lapitec or other UCS materials. Made for all porcelain and UCS materials, they perform like no other blade you have tried. Although not silent core blades, they run very quietly.

Item #	Size	
LAP14W2	14"	\$310.00

Grinding Cups for Stone

The **Slayer** hybrid bond grinding cups use a metal bond and a resin bond on the grinding face, and these are the best you can get. They are designed for wet grinding of all natural stone. Since they are a hybrid metal/resin bond they provide long life coupled with smoother finishes to get you into your next step quicker. We have them in the turbo style with either a metal or an aluminum backer or in the WGC and WRGC style cups.

These cup wheels will shape your granite, marble or quartz stone with less chipping and bounce than other cup wheels. Used correctly, they will reduce your polishing steps.

Slayer - for Killer performance!

The **Pitbull resin cup wheels** are new resin pads with a harder bond to perform like resin filled cup wheels. The **Pitbull** cup wheels will grind and shape with zero chipping on the material.

While the **Pitbull** looks like a regular resin pad mounted on an aluminum backer, the bond is a more durable, longer lasting bond that will outlast traditional polishing pads. These cup wheels can run wet or dry on all materials including granite, marble, quartz, engineered stone, porcelain, ceramic, cultured, concrete, and other stone with zero chipping.

These brazed diamond router bits by **Slayer** are the easy way to make edge detail on your stone. They can be run wet or dry and they have a 5/8"-11 threaded arbor to fit on any grinder.

They come with top and side metal bearings that ride on the vertical and horizontal edges of your stone making it fool-proof to get the shape. They have the fastest stock removal of any profiling tool on the market. Another added feature is that the steel bearing won't stain your stone or warp. **Slayer - for Killer performance!**

Router Bits for Profiling Machines

We carry top quality bits used by the professional stone fabricator to get a consistent edge on their materials. We have diamond router bits for all machines. They are available in various styles in 20mm, 30mm, 40mm or larger sizes. The most popular ones are listed here, but there are 26 styles plus combinations that we can provide for you. The bits listed here are first position bits, but we can also get you position 2 through position 6 in some cases. Our bits have a soft bond so they will always work correctly. They come with 8mm and 10mm connecting bolts.

The **Slayer 4" 5 Piece Supreme** dry pads are ceramic bonded diamond polishing pads that can be used wet or dry on marble or granite. With the 5 piece set, you will achieve a high quality finish in less steps!

These pads can be used dry on a VS grinder or on any wet polisher.

4DPP5SET \$74.90

Alpha® has expanded its line of polishing pads to now include a dry version of the Ceramica Resin. These pads utilize a new process to make the diamond layer thicker, thus creating better quality results and a longer life than typical dry resin pads. Ceramica Dry is perfect for all natural stones and cement-based composites such as concrete and terrazzo. They are hook and loop-backed. These 4" pads have grits of 60, 200, 500, 1000, 2000, and 3000. The grit sequence is specifically formulated to provide the best possible finish.

Wet Diamond Polishing Pads

The **4" Slayer Supreme Copper** wet pads are the most revolutionary wet pads on the market! These pads incorporate copper into the resin bond but are very flexible. You can use them for edge polishing or top polishing! This set of pads has nine steps, 50, 100, 200, 400, 800, 1500, 3000, 5000 grit and a buff pad. That is one more step than most pad sets but they work so fast that you won't care about the extra step!

DIAMOND PRODUCTS - 3 Step Polishing Pads

Wet Diamond Polishing Pads

Slayer 4" Engineered Stone pads are designed for polishing quartz ES. Where a regular pad may burn ES, these pads eliminate this possibility. They are also effective when used on hard granite and marble. **Slayer** pads contain a high density of diamonds to easily achieve your desired finish. From **Slayer - for Killer performance!**

Item #	Grit		Item #	Grit	
SLESSET	Set	\$109.90	SLES0400	400	\$15.90

SLES0200	200	\$15.90	SLES3000	3000	\$15.90

The 4" **Weha Donkey pads** replaced the Monkey pads. They are a diamond sponge system that are perfect for face polishing quartz based ES. Throw them in a bucket of water while you repair your scratch or level your seam with your regular wet pads. Then use these on a low speed polisher to bring back the color, gloss and texture on engineered stone! Also work great face polishing marble, granite and concrete countertops. **Donkey pads** kick A\$\$!

These are the 3" **Turboshine** top polishing discs by **Alpha**. They work well on granite, ES and marble. These discs are perfect for scratch removal. They are equipped with the newly designed dual adapter system, which dramatically reduces vibration during operation.

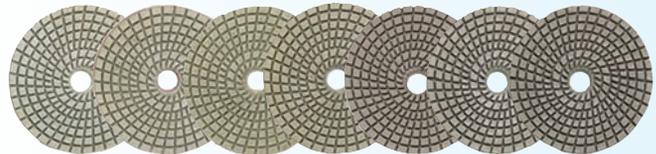

The **Slayer 3 Step** porcelain pads are excellent for polishing ceramics, porcelain, and all other UCS materials like Lapitec, Neolith and Dekton with excellent results. They also work well on granite and quartz. Since they are white you get zero color bleeding.

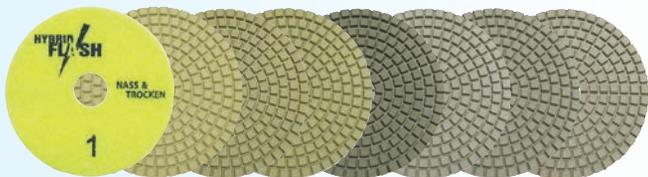

So many fabricators are using 5 step or 7 step pads to match the polish on these materials. Now you can do it with 3 pads and THATS IT! Not 3 steps and buff. Not 3 steps and 1 more. 3 steps and put it on the truck.

The **Weha Flash** hybrid wet polishing Pads are excellent for brittle and hard materials. Great for wet polishing, they leave an excellent shine with no scratches. Although this set may be used on stone, these pads are excellent on the new breed of UCS engineered stone. They work very well on Dekton, Neolith, porcelain, and ceramic tile, and these pads are the recommended pads for polishing Lapitec.

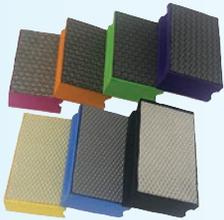

(800) 289-6834

Diamond Hand Polishing Pads

This set from **Diamante Italia** contains 7 flat pads. The 60, 100, 200 and 400 grit are electroplated to minimize and eliminate scratches while the 800, 1500 and 3,000 grit pads are resin bond for getting a high gloss finish.

HPPF7SET \$149.90

These pads measure 2 1/4" x 3 1/4" and are ergonomically designed with a foam rubber backer which helps eliminate fatigue during long periods of use. Perfect for touch-ups.

Each set include eight pads - five electroplated pads (60, 120, 220, 400 and 800 grit) and three resin bonded pads (500, 1000 and 7500 grit) each permanently attached to a rubber backer. They are available in four styles: flat pads, ogee, and bull-nose style.

Weha hand pads work with stone, ceramic, and concrete products. Grits through 400 are electroplated, 800 up are resin bonded. When used with water they will shape and polish at a much faster rate.

They measure 2" x 3 1/2" long and come with a flexible foam backing that allows them to conform.

Diamond Sandpaper

Another top quality product from **Diamante Italia** - diamond sandpaper! Okay, they are neither sand nor paper, but these pads have a diamond surface and offer the most aggressive removal rate you have seen! These H&L backed pads can be used either wet or dry on a sander or grinder. Not only can you sand and finish with them, but they also work great for preparing stone for polishing! These work on concrete, stone, tile, wood, swimming pool surfaces, even glass and metals! We stock them in 4", 5", 7" and 10" diameters.

Frankfurt Donkey Pads

The **Weha Donkey pads** are now available in a frankfurt design so you can use them to face polish quartz based ES with a slab polisher, CNC machine or even a floor machine. These are a diamond sponge system that holds a lot of water. Throw them in a bucket of water for 15 minutes before you need to use them, then use them at low speed to bring back the color, gloss and texture on engineered stone! They are perfect for face polishing quartz based ES and also work on marble, granite and even concrete countertops. **Weha Donkey Pads** kick **A\$\$!**

Diamond Antiquing Brushes

Want to give your stone a textured finished like an old leather belt? Use **Tenax** antiquing brushes. The 4" and 5" diameter pads come with a snail lock backer, or you can get them in Frankfurt style or in Fickert heads. They are suitable for working on granite and other hard materials. The coarser **Filliflex** brushes give you depth while the **Airflex** bring back color and finish. Also available in higher grits. 800 rpm maximum.

DIAMOND PRODUCTS - Antiquing Brushes

Drilling Solutions for Tile & Stone

These dry cutting brazed core bits are good for fast, chip-free cutting of marble, ceramic and porcelain tile, soft stone, concrete and glass. Very aggressive with barrel diamond protection to prevent core wear and binding, all bits come stock with a 5/8"-11f threaded arbor. From **Diamante Italia**.

Item #	Size	Item #	Size
BCB12	1/2"	BCB1250	1 1/4"
BCB34	3/4"	BCB1375	1 3/8"
BCB1000	1"	BCB1500	1 1/2"

These diamond coated bits are fluted high speed drill bits with brazed diamond on the cutting edge allowing you to make small chip-free holes in ceramic tile, marble or even glass. These wet or dry bits fit a regular chuck.

Item #	Size	Item #	Size
BDB1/8	1/8"	BDB1/4	1/4"
BDB3/16	3/16"	BDB5/16	5/16"

Slayer bits for porcelain and UCS materials are wet cutting, crowned bits. At only 2mm wide, these thin wall core bits will drill chip-free cuts through these ceramic materials. For use at up to 3,500 rpm. These porcelain core bits are great on all ceramic products such as floor tile and wall tile.

Slayer - for Killer performance!

Item #	Size
SLCBP1250	1 1/4"
SLCBP1375	1 3/8"
SLCBP1500	1 1/2"

The **Montolit Killer Gres** bit has a 3/4" tall sector type diamond matrix for best cooling and can be dressed for longer life. With two slots and V-shaping for slug removal, the FT-S long life series gives about 50% increased life compared to other porcelain bits.

FT-S35 \$179.90

Dry, fast coring in porcelain and stone up to 2cm thick. Run wet only.

These **Brazed Porcelain Bits** have a 5/8"-11" arbor to fit on a grinder. They contain paraffin to extend the life and to cool the bit.

DeFusco INDUSTRIAL SUPPLY

(800) 289-6834

These dry cutting tile bits are good for fast, chip-free cutting of ceramic, marble tile and travertine. These bits from **MK Diamond** are free-cutting and have a longer life than the brazed bits but will not cut hard products as well. Fairly aggressive, they are made for moderate to regular use. The bits 1" and larger have a carbide tipped center bit.

Drilling Solutions for Tile & Stone

The **Slayer high speed dry cutting stone core bits** are laser welded and they will cut through a granite slab in just seconds. They are made for running at high speeds - up to 12,000 rpm. You can run these wet or dry and you will get great life out of them! They are extremely aggressive and made for heavy usage. We offer a standard segmented bit, a segmented bit with diamonds brazed on both sides of the barrel to minimize barrel wear, and a T Segment with barrel brazing also. All of them come with the standard 5/8"-11f arbor.

DIAMOND PRODUCTS - Frankfurt Abrasives

Frankfurt Diamond Slab Abrasives

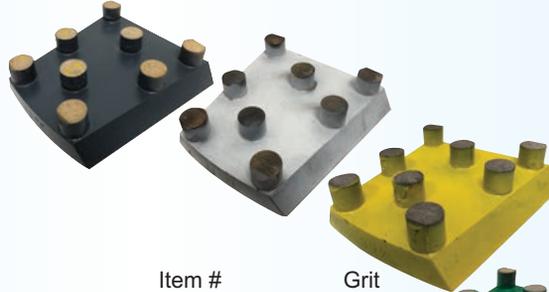

These metal bond diamond frankfurts from **Tenax** can be used for scratch removal, flattening a slab or preparing the back of a slab for polishing. Use in sequence and then go to the fine grain diamonds to polish or those with the sponges and soffflex frankfurts if you are honing slabs. The PT type are for soft materials like marble. The RVD type are for granite, ES, concrete or quartzite. In the cylinder type frankfurts you use the TT with marble and the C with the harder materials. **Call for pricing!**

These fine grain diamond frankfurts from **Tenax** polish marble, limestone and other soft stone. They will outlast Magnesite and Resin bricks many times over while polishing faster and leaving better finishes. While they cost more up front than those abrasives, since they are faster and last much longer they are much cheaper to use.

Fickert Diamond Slab Abrasives

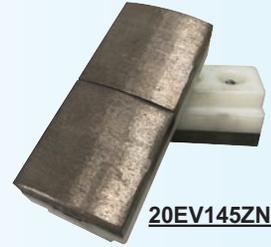

Fickerts, also known as 14cm or Comes heads, use a rotating and rocking action to make quicker, more consistent finishes on materials. They are the preferred tool for harder materials like granite or quartzite.

21FG0120GL

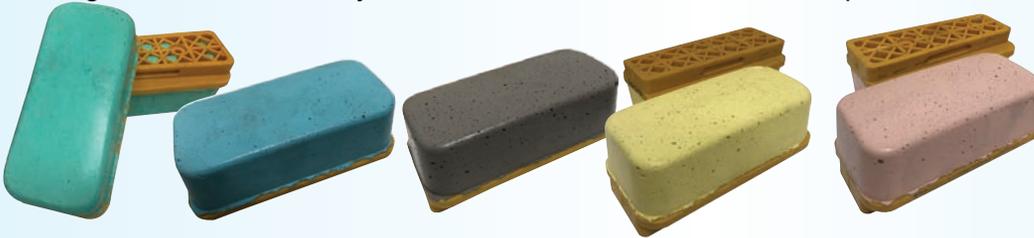

The **120 Glass** should be used after the metal bond to remove its scratch pattern and prepare the stone for polishing. It can also be used to take off the shine for honing or repolishing a granite slab.

This metal bond tool should be used to flatten a slab or take out deep scratches from stone. They will consistently cut the stone and have a very long life.

20EV145ZN

For polishing granite slabs not previously polished or with deep scratches, start with metal bond, then use the **120 Glass** to get the scratches out from the metal bond before polishing with the fine grain diamonds (FIGO). When repolishing granite leave out the metal bond and start with the 120 glass to break the polish, then go to the 120 grit **FIGO**. These fine grain diamond fickerts from **Tenax** polish granite, quartzite and other stone. They will outlast magnesite and resin bricks many times over while polishing faster and leaving better finishes. They are available with different bonds to produce the best recipe for your stone.

This Lux fickert is your final buff to give the slab an outstanding finish and a high gloss.

We do have standard polishing sequences for single head polishers that cover many different granites, marbles and other stone. Abrasive Sequences listed are for CNC frankfurt plates, radial arm machines, single head polishers and floor machines. When using these type systems keep an eye on these four things:

- Pressure – All stones will be different, the operator must watch how the abrasives are cutting.
- Speed – If they are not cutting, slow the travel speed
- Water – It is all important to have good water flow, the more the better
- Spindle speed – In the manufacturing the rpm is normally 450-550.

These **SlayerLock** discs for polishing engineered stone are available in both 5" and 6". These combo pads work equally well on bullnose and straight edges. They use white resin so they never stain your material. These premium quality, long life discs are efficient and leave a terrific finish! For polishing quartz based engineered stone these pads are economical and leave an excellent finish. **Slayer - for Killer performance!**

DIAMOND PRODUCTS - Tooling for Machines

Incremental Bits

We carry the **Slayer** 12mm thread incremental bits in regular and reverse thread for your 5 axis machine. The general purpose are for use with granite, marble and quartz based engineered stone. The Q series are made for quartzite. The UCS series are for cutting porcelain and Ultra Compact surfaces like Lapitec and Dekton. These bits are top quality. They measure 20mm x 20mm.

We also stock the mandrels to go on your machine in 2", 3" and 4" lengths. These adapt from 1/2 gas male to a 12mm female thread.

Regular Thread

Item #	Material	
<u>IBSLGP</u>	<u>Gen'l</u>	<u>\$52.90</u>
<u>IBSLQ</u>	<u>Quartzite</u>	<u>\$55.90</u>
<u>IBSLUCS</u>	<u>UCS</u>	<u>\$57.90</u>

Item #	Size	
<u>RTMAN2</u>	<u>2"</u>	<u>\$49.90</u>
<u>RTMAN3</u>	<u>3"</u>	<u>\$49.90</u>
<u>RTMAN4</u>	<u>4"</u>	<u>\$49.90</u>

Apex micro incremental cutting bits are designed for super-fast incremental cutting. These 12mm threaded bits will cut the tightest of inside curves on granite, marble, engineered stone and even quartzite. We have these 8mm diameter bits in both regular and reverse threads, so with our mandrels they can be adapted for any 5 axis machine.

Tested on granite and ES at up to 54ipm on straight runs (standard 2mm depth increments). In testing they pull 3-4 amps. The bit left very small grooves which would require minimal time to clean up when polishing. Further testing at 100ipm when straight cutting produced similar results of fast clean cutting with minimal amp load. When we cut curves the ipm was dropped to avoid putting too much pressure on the bit tip.

<u>22401-10002</u>	<u>Reg</u>	<u>\$49.90</u>
<u>22401-10003</u>	<u>Rev</u>	<u>\$49.90</u>

Easy K incremental bits from **Dongsin Diaflx** are excellent on Dekton and other UCS materials, plus they can be used on quartzite, granite and engineered stone.

These high quality bits are 20mm x 20mm with a 12mm thread. They operate best at 8,000 – 9,000 rpm with a cutting depth of .5mm per pass. The feed rate is 16" per minute.

They are made in South Korea by **Dongsin Diaflx** and come with regular and reverse threads.

Finger Bits

Our finger bit assortment will meet all of your CNC router needs. These 1/2 gas segmented bits are excellent for granite, quartzite, ES, Dekton, Lapitec and other materials. They are all high-performance tools. Made by **Slayer, Oma, Dongsin, Weha & Cyclone.**

These **Oma** green finger bits are excellent general purpose bits for granite, marble & ES. With long life, fast cutting speeds, and even wear, these modified 8 segment bits perform great on practically all stone. They can last over 1000 linear feet. One of the best bits that you can put on your CNC. Designed to run 15-30" per minute and between 6,400-9000 rpm, depending on the stone (entry and exit should be 50% of the full speed).

The life will be excellent, the wear will be even, and the bit will provide an all-around, high performance on practically all stone that is run through the CNC.

- Extra Long Life - 100+ Sinks Per
- 20mm Diameter
- 6,400 - 9,000 rpm
- Up to 30" Per Minute
- Made in Italy

Item #	Length	
<u>XT-XTBIT3HS8</u>	40mm	\$99.90
<u>XT-XTBIT4HS8</u>	50mm	\$139.90

Finger Bits

Dongsin Diaflx

This bit from **Dongsin Diaflx** features double baby segments set at a 7 degree twist and is designed to give fast cuts and long life. With a smaller OD the bits cuts with less noise and put less of a load on your machine. At 40mm x 20mm, this is an excellent general-purpose bit for use on granite and ES.

DS14049 \$119.90

Dongsin Diaflx' most popular finger bit! This unit features double baby segments set at a 7 degree twist to give fast cuts and consistent wear of the bit for long life. At 40mm x 20mm, this is an excellent general-purpose bit designed for granite, engineered stone, sandstone and limestone.

DS10835 \$119.90

These bits from **Dongsin Diaflx** is excellent for cutting quartzite and other hard stone. They features segments set at a 7 degree twist and give very fast cutting speeds and long life on quartzite.

- 19mm x 40mm
- Twin Segment
- Faster Cutting Speed
- 4,000 - 5,000 rpm
- 10-20ipm

DS16885 \$135.00

- 20mm x 40mm
- Full Segment
- Longer Life
- 3,000 - 5,000 rpm
- 8-16ipm

DS16741 \$129.90

- 23mm x 50mm
- Full Segment
- Longer Life
- 3,000 - 5,000 rpm
- 8-16ipm

DS16800 \$139.90

The **Dongsin Diaflx** porcelain bit has 8 segments set at a 7-degree twist for fast, clean cuts and consistent wear for long life. This 35mm x 20mm bit is excellent for all porcelain and UCS materials. It is designed to run 13-14" per minute between 5,500-5800 rpm, depending on the material

DS16826 \$149.90

The **Lapitec** CNC finger bit are specifically designed for use on all thicknesses of **Lapitec**. This 6 segment bit will cut the material quickly and cleanly and will give you long life on a difficult to cut UCS. This bit can be run at 4,000 - 5,000 rpm and, depending on material, up to 25" Per Minute.

- Chip-Free Cutting
- 22x35mm
- Up to 25" Per Minute
- Made in Italy

LAPFB35MM \$179.00

CNC Router Core Bits

Weramic CNC porcelain ceramic core bits for Dekton, Lapitec, Neolith, and other large format porcelain panels have a 1/2 gas arbor to fit all CNC routers The **Weramic** porcelain core bits have been built to core perfectly smooth, chip free holes on all thickness materials from 6mm through 30mm. With a 2mm thick rim these thin wall core bits will drill very fast through these materials.

Item #	Size

Backer Pads

Item #	Size	
5HLBACK	5"	\$9.99
7HLBACK	7"	\$12.99

High quality sandpaper backers with H&L backing and a 5/8"-11 arbor have foam rubber bodies to conform to your surfaces.

The soft rubber backers are the most flexible backer pads. These have premium grade H&L for holding your pads in place.

Item #	Size	
ULTRAFLEX3	3"	\$14.90
ULTRAFLEX	4"	\$17.90

The **Alpha®** 4" rigid backer pad is great for straight edge or flat polishing applications. The rigidness of the pad enables you to work in small areas and reduce surface distortion and wavy results on flat edges.

GP45/8RG \$24.25

These adapters take you from a 4" snail lock backer to an H&L polishing face to accept a polishing pad (steps 3, 4 and 5 in the 5 step snail lock backed sets we carry). There are different thicknesses to match up with your machine, 3/8" or 3/4".

Item #	Thickness	
C91P0441	3/8"	\$26.90
SLS4-BACK	3/8"	\$22.90
C91P0443	3/4"	\$32.90
VZ051042	3/4"	\$13.90
VZ051043	3/8"	\$15.90

Weha Frankfurt H&L Back Up Pads are made of strong PVC plastic with an H&L backing. Excellent for use on radial arm and other single head machines.

5006984 \$12.75

We carry 3", 4" and 5" H&L backed backer pads in flexible rubber, rigid rubber, plastic or aluminum. These are high quality and will provide excellent service.

3" Backers

Item #	Style	
DIBP3-F	Rubber	\$10.90
DIBP3-R	Rigid	\$10.90
DIBP3-P	Plastic	\$10.90

BCBAD	5/8"-11M to 3/8" Post	\$22.90

These 7/16" thick industrial grade foam spacers have H&L backing on both sides. They are for use with floor machines. They will give extra clearance for your 3" & 4" pads when needed.

Item #	Size	
FR03	3"	\$4.99
FR04	4"	\$7.99

This is a lock nut kit for use on all 5/8-11" spindle grinders, polishers, and sanders. It includes the hub adapter and the lock nut.

58AD \$24.90

This 4 hole brass flush mount adapter allows you to turn any grinder into a flush cut saw. Just screw this flush cut adapter onto the grinder and attach your blade.

BA-4HB \$16.90

Ceramic Bond Floor Discs & Resin Discs

These are the 3" **Slayer** Ceramic bond diamond floor discs for polishing concrete slabs. Great on hard concrete, they are available in 30, 50, 100, 200 and 400 grit. These discs can remove deep scratches and bring the floor to a low gloss finish.

They can be run wet or dry and have no H&L heating problem. That being said, if you run them wet they do leave a much better finish, even with minimal water.

Item #	Grit	
SL3CBFD030	30	\$24.95
SL3CBFD050	50	\$24.95
SL3CBFD100	100	\$24.95

Floor Maintenance Pads

These 17" "pressed" carbon steel wool pads are extremely good for uneven floors. These pads are made to be very aggressive with more surface area touching and scrubbing the floor than other types. They may bind up more but will be more efficient in extremely tough areas. They resist tearing and fraying.

17CSPAD \$12.95

These 17" "pressed" stainless steel wool pads are every bit as good as the other ones but will not rust. They are made from type 434 stainless steel so they will not mark white materials. With excellent corrosion resistance in wet or humid areas and high temperature applications, these are grade MSS and are fine, comparable to 00.

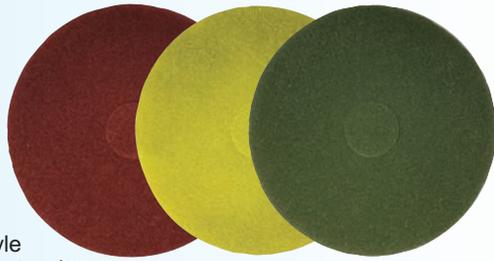

17SSPAD \$28.95

(800) 289-6834

Diamond Floor Maintenance Pads

The 17" three step diamond impregnated pads from **Bonastre** are also high quality DIP pads for working on concrete or natural stone. The #1 DIP is perfect for cleaning and resurfacing concrete or natural stone floors. The #2 DIP will bring out the true color of the material. The #3 DIP is perfect for a glossy finish on concrete or natural stone floors. **Bonastre Systems** says speed is not an issue. They worked well on any floor machine that uses 17" pads. The testing on these pads was conducted anywhere from 90 to 110lbs. System can be used with an auto scrubber, even dry.

Item #	Style	
<u>BON17D1</u>	<u>Pad1</u>	<u>\$69.90</u>
<u>BON17D2</u>	<u>Pad2</u>	<u>\$69.90</u>
<u>BON17D3</u>	<u>Pad3</u>	<u>\$69.90</u>

These 17" floor buffing pads are great for light wet polishing and maintenance of polished concrete and natural stone. They can also be used for cleaning and resurfacing concrete or natural stone floors. The 400 grit pad is used for deep scratches and shallow gouges. It will not grind the floor flat, but will remove scratches. The 400 grit pads are seldom used, but when they are, they are for heavy use. These pads work very well on floors that are very dirty with surface scratches. The finer ones are for regular maintenance.

Item #	Grit	
<u>PLP170400</u>	<u>400</u>	<u>\$39.90</u>
<u>PLP170800</u>	<u>800</u>	<u>\$39.90</u>

The Ultra Grizzly hogs hair pads by **Norton** are great for buffing stone with a polishing compound to get the stone to pop with an ultra high gloss finish! Excellent for use with **MB-20** granite polish.

Item #	Size	
<u>66261015254</u>	<u>6 1/2"</u>	<u>\$4.99</u>
<u>UG775</u>	<u>7 3/4"</u>	<u>\$5.99</u>
<u>UG17</u>	<u>17"</u>	<u>\$9.99</u>

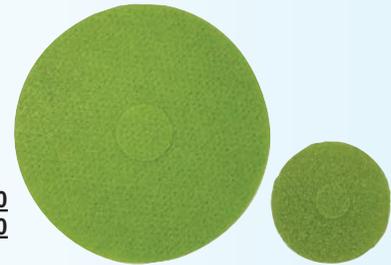

These DIP's are for handheld or floor machines to hone and resurface stone and concrete floors. Made by **Norton**, they produce a great finish. The coarse pad works very well for floors that are very dirty with light surfaces scratches. The medium grit pad should be used next, but can also be the starting pad on cleaner floors. The fine grit pad is the next step and may be used as a maintenance pad on most surfaces to retain the shine of the floor. The very fine grit pad is the final step and is recommended for ongoing maintenance of the floor. Available in 7" and 17" diameters.

Epoxy

Epoxy

LamLock® flowing epoxy is for laminating granite, marble and engineered stone. This structural epoxy is a permanent adhesive that will glue stone to stone, metal, and other substrates. It can be colored to match the stone and is easy to polish. Uncolored, this glue will dry completely clear like water. This is an express formula designed to harden more quickly than other brands, even in colder temperatures. In our tests at 75 degrees the glue was hard in 60 minutes with 12 hours to cure. After 90 minutes it was hard enough to grind on with power tools!

Tenax Rivo 15 is a two part knife grade epoxy for all stone. **Rivo 15** is one of the strongest epoxies in the stone industry and will bond to almost any surface. Suitable for temperatures below 32° as well as extreme heat and is VOC Compliant. At room temp, gel time is 15 minutes, tack-free in 60 - 90 minutes, cure time 24

TEEKR15	2ltr	\$54.90
----------------	-------------	----------------

Tenax Rivo 50 is also knife grade epoxy. This 1:1 mixture has the consistency of warm peanut butter, which makes it easier to apply for vertical applications. This epoxy is excellent as a structural epoxy. Very similar to **Rivo 15** except gel time is 50 minutes, tack free in 120 minutes, cure time 24 hours.

Item #	Size	
TEEKR50	2ltr	\$54.90
TEEKR50P	34ltr	\$669.90

Tenax StrongEdge 45 is a 1 1/2 quart VOC compliant gel epoxy with a 2:1 mix ratio and a set time of about 45 minutes at 75 degrees. An excellent choice for gluing miters on difficult materials.

TEGEL1.5Q	\$59.90
------------------	----------------

StrongEdge Express is a water clear flowing epoxy made for fabricators. This fast setting 2:1 laminating epoxy from **Tenax** is hard in 1 1/2 hours at room temperature.

Item #	Size	
TESTRONG1.5Q	1.5 qt	\$64.90
TESTRONG3G	3 gal	\$312.90

Tenax Micto epoxy is an ultra fast setting epoxy that is great for repairs and fast touch ups on stone and ceramics.

This mercaptan epoxy is available in a 2 liter kit and in a 250ml cartridge with a ladder nozzle to mix it together. At room temperature the pot life is a mere 5 minutes! Cartridge uses **M200XMR** gun and **GB-MFQ-824** tips.

Item #	Size	
TEME250	250ml	\$39.90
TEMICTO1+1	2 ltr	\$119.90

Tenax Domo 10 is a two part knife grade epoxy designed for all types of stone. **Domo 10** is also very strong epoxy and will bond to almost any surface, whether that surface is damp or dry. Suitable for temperatures below 32° as well as extreme heat. Recommended for both interior and exterior applications. VOC compliant. At room temp, gel time is 120 minutes, tack-free in 300 minutes, cure time 24 hours.

Epoxy

Tenax Elix is an extra clear epoxy knife grade glue approved for food contact (Reg (EC) N 1895/2005). Suitable to fill, glue and laminate all stone and ceramic materials, this low-yellowing adhesive can be used indoor and outdoor. This product is extra clear, soft and light, easy to spread and low VOC! The kit has 1.5kg of resin and .75kg of hardener. Also available in 210ml and 400ml cartridges for easy application.

TEELIOXAB-2.25KG \$129.90

Item #	Size	Price
TEELIOXCS	210ml	\$31.95
TEELIOXCL	400ml	\$61.90

If you use these cartridges, you need the correct gun. The 210ml will work with the M200XMR and the 400ml requires the TEEL400GUN. Both cartridges use the TEELIOXTIP replacement tip.

Fixtop is an easy to spread epoxy paste for gluing and joining marble, granite, agglomerates and ceramics. Each two gallon kit provides 500 square feet of coverage. Excellent for damp or wet environments.

At room temp, gel time is 60 minutes, tack-free in 120 minutes, cure time 24 hours. If you prefer more work time try **Fixdeck**.

It takes 120 minutes to gel and is tack free in 240 minutes.

LamLock® Infiltrating

is a low viscosity epoxy used for repairing fissures and cracks in stone. This 24 ounce kit is slow-drying, allowing it to infiltrate deep into the stone to bond cracks from the inside and strengthen it.

LLINF24 \$54.90

Vinyl Ester Resins

Titanium flowing is the liquid version of the latest vinyl ester technology. This flowing glue is clear with a white look. It does not yellow after kicking or darken after curing, is stronger than a polyester glue and gets hard in 10 minutes! Exceptional strength for CNC and line machine use, **Titanium** is superb on white marble, quartz, and other stone. Ideal for seaming, laminations, miter cuts, chip repair on all granite, marbles, quartz and quartzite materials.

Titanium Extra Clear is the latest vinyl ester technology. This knife grade glue is clear white. It does not yellow after kicking or darken after curing, is stronger than a polyester glue and gets hard in 10 minutes! Exceptional strength for CNC and line machine use, **Titanium** is superb on white marble, quartz, and other stone. Ideal for seaming, laminations, miter cuts, chip repair on all granite, marbles, quartz and quartzite materials.

Epoxy & Vinyl Ester Resin

Polyester Resins & Acrylic Glues

Tenax Tixo knife grade polyester resin is excellent for laminating marble or engineered stone and can be used for fills or seams on any natural stone. Under ideal conditions, gel time is 3-4 minutes with a full cure of 2 hours. **Tenax's** strongest polyester resin.

Item #	Size	
TEKG01	1 ltr	\$21.90
TEKG04	4 ltr	\$59.90
TEKG17	17 ltr	\$159.90

We also have **Tenax** knife grade polyester resin in white which is excellent for use with white engineered stone. This 1 liter can of glue takes color and is easily polishable. Gel time is 3-4 minutes with a full cure of 2 hours.

TEKG01W \$21.90

Tenax Super Transparent water clear knife grade is a high viscosity polyester adhesive used to vertically or horizontally repair, rebuild, bond, and fill. This one quart can is very smooth in consistency, very polishable and colors easily to match the stone. Perfect for light colored stones such as Carrara and Thassos. Many uses for this glue for repairs, seams and even laminations on white marble. If you are looking for a water clear polyester resin, this is it!

TEKGP02 \$35.90

Tenax Polyester Hardener is for their resins. The Polyester resin you purchase does come with hardener, but some of our customers request extra hardener, because mixing that type of ratio is an inexact science. The BP catalysts can be used with all poly & vinyl ester resins. The MEK is for **Crystal** and **Super Transparent**.

Item #	Size & Type	
TEH45ML	45ml BP	\$4.99

F023341	Crack Sealer	\$39.90
F015581	Super Pen	\$39.90

Mastidek Glue for Dekton

Tenax makes the **Mastidek** Cartridge Glue for **Cosentino Dekton**. This is a bi-component glue that has very high adhesion in a short amount of time. This allows for cutting and polishing the assembled parts in a short time.

This product is produced in 215ml cartridges. The glue and hardener are pre-dosed in the cartridge which, once inserted in the M200XMR cartridge gun with the special mixer fixed on top, allows the correct extrusion and mixing. The mixing tip for this glue is the GB-MFQ-824 (the Glaxs tip) Other colors available, **\$31.95** each. Below is a list of current colors and the Dekton they are made to be used with.

 M3HAERIS Aeris, Khalo	 M3HALDEM Aldem	 M3HBALTIC Baltic	 M3HDARKGREY Kreta, Manhattan, Orix, Sirocco, Sogne, Soke, Strato, Vera	 M3HDOMOOS Doomos, Sirius, Spectra,	 M3HEMBERS Embers

Cartridge Glue for Dekton

Glaxs

Cartridge Glues - Glaxs

Glaxs glue from **Tenax** is a bi-component glue for indoor or outdoor use. This UV stable glue won't darken, yellow, or break down in the sun. **Glaxs** will not bleed and it can freeze and thaw without cracking. This is an excellent glue for both indoor and outdoor applications. Initially designed for white marble, it is now available in its original transparent form or precolored in cartridges. **Glaxs** is a solvent free, low viscosity, odorless glue.

Glaxs curing time is consistent, about 45 minutes for original formula, 25 minutes for fast and colors and 5 minutes for ultra fast. Truly superior over all other traditional cartridge glues. The cartridges are 2:1 bi-axial. Pricing is **\$31.90** per cartridge. Here are the most commonly used colors:

Other Glaxs & Cartridge Glues - Coloring Kits

Titanium Cartridge Glue

Titanium Cartridge Glue

Tenax Titanium extra rapid cartridge glue is the latest Vinyl Ester technology. Works great on marbles, ES, granite, quartzite, and ceramics. This is an excellent alternative to Methacrylate glues as it is faster cure time, stronger and costs less!

This glue gets hard fast so you can grind and polish it in just 10 - 20 minutes. The hardened product is hard, shiny and polishable. The product is packaged in a special bi-component cartridge. The glue and hardener are pre-dosed in the cartridge. This setup allows the correct extrusion and mixing of the product which is then ready to be used. Tenax Titanium extra rapid cartridge glue is available in a wide variety of colors with more on the way. This styrene-based glue is made for indoor use. **\$24.00** per cartridge.

Multibond Cartridge Glue & Black Mamba Glue

Black Mamba Glue

With **Black Mamba** Glue you can install a sink in just 10 seconds! Start with clean, dry surfaces. Run a bead on the sink flange and push it into the underside of the counter with enough force to compress the glue. Hold for 10 seconds and now this high tack adhesive has created the suction to hold the sink in place while it cures. No installation hardware needed, and no call backs for crooked sinks.

This is a high viscosity, high tack adhesive. Shrinkage is at 1% and the elongation at break can go up to 400% which enables it to resist impacts, vibrations and peeling. It has also obtained the M1/F1 accreditation for fire and smoke resistance. It is resistant to water, UV exposure, yellowing and aggressive environments such as alkaline, diluted acids, polar solvents, oils and more. Available in white, grey and black.

Sold by the case, quantity discounts available.

This compound caulk gun allows for quick dispensing of **Black Mamba** glue.

If you need an on-the-job-site repair solution for nicks, chips and gouges, **FillaChip** is it! Made for fabricators by a fabricator, it is super fast and amazingly repairs stone to a perfect finish. In the **Starter Kit**, you get a UV flashlight, 4 syringes with 3cc of **FillaChip** glue, 1 syringe with 3 cc of polish, 10 dispensing tips and 8 plastic release sheets.

FILLACHIPKIT \$99.50

The refill kit contains 4 syringes with 3cc of **FillaChip** glue, 1 syringe with 3 cc of polish, 10 dispensing tips and 8 plastic release sheets.

FILLACHIP-R \$49.50

FillaChip single color kits and tips and release sheets are also available. The colors include a 3cc syringe of colored **FillaChip** glue and one 3cc syringe of polish. We stock them in 15 popular colors. Tips and release sheets are also listed.

Aerosol Activator

TEFILL3A \$14.90

These dual viscosity chip repair kits are **Tenax** cyano acrylate compounds that dry in under a minute and leaves a gloss finish on the stone while filling an imperfection. Just fill the "hole" with the adhesive and spray on the activator. In a minute or less it will be hard. Scrape off excess until flush with the stone. This cyano acrylate will dry water clear like glass.

TEFILLKIT \$32.90

Stone Treatments

Stone Treatments

Tenax waxes are designed to give you an ultra high gloss on your polished stone surfaces. Excellent for final buffs to get a super-gloss finish. We have 1 quart cans in clear for all stones and black for use on dark stone only. Tenax waxes perform beautifully!

Item #	Type	
TFW01N	Liquid Clear	\$19.90
TSW01	Paste Clear	\$19.90
TSW01B	Paste Black	\$19.90

Tenax Telux is a self-polishing stone varnish that gives an immediate polish to granite, marble and other natural stone. You just paint this on to the surface of your stone and it shines!

Telux stone varnish is made specifically for stone, comes in a 1 liter can and is great for the final step on a chiselled edge of stone.

TELUX1L \$39.90

Tenax Tepox dye for natural stone can be used indoors or outdoors. It can restore or enhance stones like black granite and yellow exotic granite. Use it directly on stone or add it to resin based products to permanently change the stone's color. Full strength for a higher magnitude of color change or diluted with a resin based stone treatment like Ager or Pectro.

Stone Treatments & Stone Cleaners

Stone Cleaners

Stone Cleaners

Tenax rejuvenator 14oz spray polish can be used to give a high gloss to your stone counter tops. This stone polish works immediately to brighten granite color and can be used anytime. This 11 oz liquid spray can be used regularly to enhance your granite counter tops or floors.

TEPOL14 \$15.95

Use **Lustro Wipes** everyday to safely clean granite, marble, laminate, quartz, engineered stone, limestone, travertine and solid surfaces - even use them on stainless steel and glass! Each container comes with thirty 7" x 9" wipes.

LUSTROWIPES \$8.95

Ultimate Spray Polish & Protector is a unique product because it is a semi-impregnating cleaner and polish that can be used to clean and finish many different materials, leaving your surface smudge-resistant with a slick feel. This product must be used with a micro-fiber cloth!

ESCULTMT16 \$16.95

Easy-Oxy is an amazing stone and multi-surface cleaner with the germ killing power of hydrogen peroxide and citrus. This daily cleaner is designed for frequent use on granite, marble, quartz, Corian®, tile and grout, and other hard surfaces. Perfect for light and heavy cleaning of showers and other hard to clean surfaces.

EASYOXY32 \$13.95

Tenax Ax is a water based descaling cleaner designed specifically for use on quartz material with a variety of finishes. It quickly and effectively cleans and removes coarse dirt that may be present on the surface of ES. It also works to remove lime deposits from surfaces in agglomerated quartz based ES.

TEAXE1L \$24.95

Tenax Bravo quartz stain remover cleans difficult stains from ES. Spray it on the surface, leave on surface for the recommended time for that stain, then clean and rinse with a damp sponge cloth. Chart is online.

TEBRAVO32 \$19.90

Tenax Quartz Extraclean Pro is a solvent-based cleaner for hard surfaces. Designed to remove grease stains and marks left by lifter suction cups. It penetrates into the material to remove the stains. This cleaner will remove sharpie ink, grease, paint marker and other hard to clean stains. This is a hard-working heavy duty cleaner that gives excellent results.

Item #	Size	
TEQEC250	250ML	\$19.90
TEQEC1Q	1 QT	\$35.90

Tenax Booster is a 32 ounce tile and hard surface cleaning product that can be used for a variety of cleaning tasks. It can be used as a stain remover (full strength) on specific materials or as a cleaner (diluted).

TEBOOSTER \$14.95

Easy Scrub is a loose scrub cream for removing water spots, film, residue and light deposits off glass, marble and other surfaces where conventional cleaners don't work. Use **Easy Scrub** with a soft white pad for general deep cleaning, or with a firm felt pad for more aggressive cutting action, like on glass to remove heavy buildup. Easy Scrub will not scratch glass and is safe to use on just about any surface.

Stone Cleaners

MB-3 is a unique combination of special non-acid chemicals that quickly and easily dissolves and removes dingy unsanitary soap scum and hard water mineral deposit from shower walls, floors, doors, wash basins, and bath tubs.

MB-3 **\$19.95**

HD-13 is a heavy duty alkaline cleaner used for cleaning stone and tiles. This sodium hydroxide based cleaner has a pH balance of 13 and is made to reactivate and clean the dirtiest stone.

HD-13 is a concentrated formula that cleans and removes greases from natural stone and grouts. Safe for all natural stone and tile surfaces.

BONHD13 **\$39.90**

MB-5 is a slightly alkaline (pH 9) combination of special chemicals that quickly and easily cleans marble vanities, walls, granite counter tops, ceramic, corian, porcelain, glass, and most other hard surfaces. It is not designed to clean heavily soiled areas, or remove soap build-up.

MB-5 **\$22.95**

MB-9 removes mildew stains and odor from granite and marble without damaging polished surfaces. Cleans mildew stains on contact without scrubbing. Just spray and watch mildew stains disappear within a few minutes! Safe on most polished and natural marble surfaces.

MB-9 **\$21.95**

Marble Polish

Atomic 5X is a hotter traditional Italian marble polishing powder made for the professional restoration contractor. While this product will work faster than **Dynamite 5x**, due to the higher acidic content it is truly made for professionals that desire a more acidic "hotter" marble compound.

Item #	Size	
5XMPPA-2	2lbs.	\$34.90
5XMPPA-5	5lbs.	\$74.90
5XMPPA-55	55lbs.	\$495.00

Dynamite 5X is a traditional Italian marble powder that really makes the stone pop with shine. It can be used on marble, travertine, limestone, terrazzo, and other calcite stones. It is a potent, but non-problematic, easy to use, and easy to clean up marble compound. Fast working, but not too hot, it dissolves immediately in water, so it goes right to work.

Item #	Size	
5XMPP-2	2lbs.	\$34.90
5XMPP-5	5lbs.	\$74.90
5XMPP-55	55lbs.	\$495.00

TeEtch is designed to remove etch marks, water marks & water rings from marble. Use a rag to rub the **TeEtch** over the blemish and in just a couple of minutes, the etch and water mark will be removed and the stone re-polished back to the original finish!

TEETCH **\$19.95**

MB-11 marble powder is designed for spot polishing of most water stains or light etches from polished marble. Just buff with a damp rag and bring back the shine.

MB-11 **\$34.90**

Cerium Oxide is an all-purpose polish for glass and other materials containing silica. Just create a slurry with water and buff material with a felt wheel or polishing cloth. Wipe down and dry with a clean microfiber cloth. Cleans up easily with water.

CEROX1LB **1lb** **\$34.90**

Tin Oxide can be used to buff out scratches and scuffs and bring back the original luster to marble and granite surfaces. This is very good alloy powder for polishing stone. Tin oxide can be mixed with water or fine oil to form a paste that will impart a high luster.

Item #	Size

MB ZERO+ marble polishing powder is easy to use and produces superior clarity and shine, thus allowing you to polish to a high gloss. **Zero+** is a specially formulated powder for all calcite-based stones that creates a tremendously high shine with Zero oxalic acid.

Item #	Size	
MBZERO+1LB	1lb	\$29.90
MBZERO+2LB	2lbs.	\$55.90

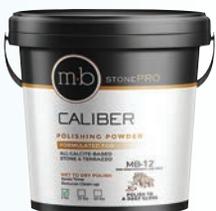

Tenax marble polishing powder is made for marble, travertine or limestone. It will bring out a high gloss finish on all types of calcites. To use, mix with water to make it toothpaste consistency, then buff with a white pad until you have reached the desired gloss level. Also available in a 15kg bucket.

Item #	Size	
TEMPP1KG	2lbs.	\$29.90
TEMPPKG15	15kg	\$219.90

MB-12 is a marble polishing powder specifically designed for wet to dry polishing, although it may be used for wet polishing. It enables a well trained operator to polish between 1200 and 2500 square feet per shift. Always delivers a gloss that is obviously higher than the "factory polish!" It will work on granite as a cleaning Agent.

Item #	Size	
MB-12SM	1lb	\$19.90
MB-12LG	8lbs.	\$129.90

MB-22 is a cooler combination of abrasives for spot polishing of most water stains or rings from polished marble, travertine and any other calcite-based stone. It uses acid in a crystallized form which prevents spatter from etching. For stones that burn easily this is the best choice.

Item #	Size	
MB-22TR	1lb	\$22.90
MB-22BUCKET	10lbs.	\$149.90

Dia-Glo marble polishing compound from **Abrasive Tech** is great for that final luster on marble! This one quart (2.2lbs.) container will make worn finishes look new! Just add water and buff. When you get to the desired gloss level wash it off and you have affected the stone!

C920M003 \$41.82

Dia-Glo granite polishing compounds from **Abrasive Tech** are great for that final luster on granite! Available for dark granite or light granite, these one quart (2.2lbs.) containers will make worn finishes look new! Just add water and buff. When you get to the desired gloss level wash it off and you have affected the stone!

Item #	Type	
C920GD03	Dark Granite	\$39.90
C920GL03	Light Granite	\$39.90

MB20 granite polishing compound is a breakthrough for polishing granite. It is so effective that granite and engineered stone gloss surfaces can be improved 20-30% from their original factory finish. It is excellent for getting the final high gloss finish on difficult to polish granites. This is the professional's choice - just ask the members of the Stone Fabricator's Alliance!

Item #	Size	
MB-20SM	8.5oz	\$29.90
MB-20	2.2lbs.	84.90

DUGG Ultra Gloss granite polishing powder can be used on granite and other dense materials to get the stone to pop to a full gloss. Mix with water or fine oil to form a paste that will impart a high luster after you use it to buff the stone. 2 pound package.

DUGG-2 \$34.90

Polishing compounds used with either a muslin pad or felt wheel will give you that extra "pop" for that high gloss finish on all stone.

RESEARCH

TECHNOLOGY

INNOVATION

Everything for the Stone Industry

In 1949 Mr. Ludwig Werwein founded a small commercial company for local stonemasons in Augsburg, Germany. It was sold in 1977 to Kurt Aigner. Weha's continued growth required the construction of a new headquarters in Konigsbrunn. Weha distributes its products worldwide.

**Donkey Pad
Inline Polishing
System**

In 2011, Weha Germany opened up the USA branch located in Charlotte, NC. The purpose was to better serve the US market. Weha products consist of: stone material handling equipment, granite and stone transport, stone storage systems, slab a-frames, clamps, slab and stone vacuum lifters, scissor lifters, air tools, monument tools, diamond tools, personal protection equipment and much more. Weha also works with outside manufactures to produce premium, custom products, made exclusively for Weha.

In 2011, Weha Germany opened up the USA branch located in Charlotte, NC. The purpose

**Bridge Saw
Blades**

Weha USA will stock items that are most used in the US. Weha will continue to listen to the US market, review products, and manufacture items specifically for US fabricators. We look forward to providing products that will make stone fabrication easier, safer, and faster.

**Double-sided
A Frame
Transport Carts**

Weha's customer service is second-to-none and customer satisfaction is one of our main goals. Weha USA is continually looking to improve their products and marketing new products throughout the year.

Weha's customer service is second-to-none and

Silicon Carbide Sanding Discs

We carry **Starke** brand 4" & 5" hook & loop backed silicon carbide sanding discs for use with grinders or sanders. This German made sandpaper is designed for wet or dry sanding of natural stone. These 'C' weight closed-coat discs are made of an anti-clog, no load, resin over resin bond. They are waterproof with a latex backing. The discs can be used for shaping, sanding and even polishing marble, granite and other natural stone.

4" are **\$0.49** each or in 50 packs for **\$0.39** each,
5" are **\$0.59** each or in 50 packs for **\$0.49** each.

Item #	Grit	Item #	Grit	Item #	Size	Item #	Grit

StoneGlo Backlighting System

This is the **StoneGlo Backlighting System**, an energy-efficient and innovative LED system for commercial and residential use. The **StoneGlo Backlighting System** is ideal for backlighting transparent, translucent and semi-translucent stone counter tops including onyx, granite, agate, quartz, glass, quartzite, etc. If you want your stone to glow use **StoneGlo!**

These 12" x 12" panels, which are available in white or RGB (red, green, blue or white) can be cut by the installer to achieve virtually any shape. With these panels you will get a consistent light throughout the area being backlit. These LED backlighting panels are able to be installed by the fabricator if they choose to do so, giving them another revenue stream. With a proven track record and thousands of panels installed for many different projects, **StoneGlo** is known for its ease of use, consistent lighting and durability. The panels generate little to no heat and will last for years even if you are running them for 24 hours a day. Simple to customize, simple to install, simple to use! The panels are 12 volt. To use with a 110 volt AC current you will need a class 2 UL listed driver. We carry electronic and regular drivers. If you want to use these with a dimmer you will need to get the electronic driver (electronic drivers are available in larger capacities).

The **StoneGlo** panels can be custom-cut on the job-site with a variety of carpenter saws or a bandsaw. The installer can easily cut and shape the panels to fit around the sink, counter tops, overhangs, and edges. No longer is there a need to wait 8 - 12 weeks for a customized panel to be made or to settle for inferior lighting systems that leave bright spots and dark spots throughout the project. If you want your stone to glow use **StoneGlo!**

- No Hot Spots
- No Dark Spots
- Low Voltage
- Easy to Install

Reciprocating Saw Blades & Hole Saws

These are the The **Lenox® Advantage™ Tuff Tooth™** bi-metal reciprocating saw blades. They are the standard in the industry that every other blade is compared with, and we have a great price on them for you! These U.S. made blades are known for their long life and fast cutting speeds. The best quality you will find in the world!

All **Lenox** reciprocating blades are made from a super tough bi-metal alloy. They are shatter resistant and retain their sharpness longer than any other blade. The primary use of the metal cutting blades is fast cutting of metal 1/8"-1/4" thick, conduit, tubing, etc. while the primary use of the rough in blade is fast cutting of wood with embedded nails.

Item #	Size	Price
LRB618	6" 18TPI Metal	\$2.99

LRB96	9" 6TPI Rough-In	\$3.89
LRB126	12" 6TPI Rough-in	\$4.99

These are the **Irwin** line of bi-metal reciprocating blades for metal cutting or roughing-in. We tested these blades against all other brands and loved the results - and you will too. These blades are long life and extra sharp to make your work quick! The metal cutting blades are excellent for hard metals and the roughing-in blades are great for cutting wood with embedded nails. **Irwin** blades - another U.S. made product from the makers of **Lenox**.

DeFusco INDUSTRIAL SUPPLY

GoClips 5 second anchors are just that - take a grinder, cut a slot and insert. Available in 3 types, one for standard sinks, one for stainless steel and one for extra thick sinks.

Item #	Desc & count	
ZKGO-SS	Stainless, 50pcs	\$52.50
ZKGO-STD	Standard, 25pcs	\$34.95
ZKGO-XL	Extra large, 20pcs	\$28.90

With **Sinkits**, there are no clips, screws nuts, washers or anchors to keep track of! Just drill a hole and insert the clamp! Universal design works with all types of sinks with up to 3/4" thick. Also available in XL size for sinks up to 1 1/8" thick.

Item #	Count	Item #	Count
SINKITS70	70	SLOTKLIPS-65	65
SINKITS-B	350	SLOTKLIPS-B	325
SINKITSXL60	60	SLOTTHR-50	50
SINKITSXL-B	300	SLOTTHR-B	250

Slot-Klips work the same as **Sinkits** except they insert into a slot cut with a grinder versus a hole in the stone.

The **EZ Sink** bracket mounts to the front and back edge of the cabinet. The support rails are then placed in the brackets and adjusted to tighten the sink to the stone. This product can be installed before or after the counter tops,

EZSINKBR \$9.90

reducing time needed for installation as well as cost of materials. Wood pieces measure 22" x 1 1/2" x 7/8", with the top piece measuring 12" x 7/8".

The **EZ Dish** dishwasher bracket is U.S. made and makes anchoring dishwashers easy. This bracket eliminates callbacks for dishwasher anchoring, which saves time and money.

EZDISH \$5.99

LC Brackets from **Sinkits** are undermount sink mounting brackets are great when there is not enough clearance for conventional clips or clamps and repair work.

LCBRACKETS - 1 pair \$3.79

Pneumatic Wet Polishers & Grinders

The **Weha 7270012** side exhaust center feed wet polisher is also designed for all day everyday use! With two hoses, one for air and one for water this air polisher is super light at only 2.6lbs. which makes it easy to handle and lessens user fatigue.

- Side Exhaust
- Premium Bearings
- Special Grease Port
- 16 cfm @ 90 psi

7270012 **\$266.00**

The **Weha WH185 5"** high speed grinder and cutter is a front exhaust tool that uses a 5" blade or cup-wheel. With external and central water feeds this tool supplies water as needed. It has a paddle trigger for complete control over the air cutter at all times. One great feature is that at 9.8cfm at 90psi it uses less air than other air grinders.

143286 **\$295.00**

The **CDT** pneumatic wet tools are durable and dependable. We carry the wet polishers in 5" and 7", and a high-speed wet grinder. They are lightweight with a compact design. All moving parts are heat treated and provide anti-grinding protection. They feature a rear exhaust design and are environmentally friendly.

CDT125WP **5"** **\$249.90**

CDT175WP **7"** **\$359.90**

CDTHSG **Grinder** **\$199.90**

The **PSG-658** from **Alpha** is a high-performance wet pneumatic stone grinder that comes with a very unique center water-feed system to deliver ample water to keep the dust down on the floor and also enhance the performance of the wheel. It is smaller and lighter than electric angle grinders and offers better maneuverability along with all the safety features.

- Rear Exhaust
- With 15' All-Weather Hoses
- Composite End Case
- 15 cfm @ 85 psi

PSG-658 **\$435.00**

Alpha Professional Tools has a high performance dry tool with its **PSG-125 5"** pneumatic grinder. This industrial quality dry grinder has a powerful 1.4hp motor with speed control governor. It is compact, has an ergonomic aluminum body, a reversible safety lever throttle, and two auxiliary handle positions. Its adjustable rotating exhaust and built-in oil port make this tool great for any environment! Wet cutting kit available

- Rotating Exhaust
- Kink-free Air hose
- 2,000 Hour Duty Cycle
- 33 cfm @ 90 psi

PSG-125 **\$655.00**

Electric Wet Saws

The **Alpha ESC-125** wet saw is able to provide perfectly straight cuts which are required for quality fabrication and installation. Equipped with one of the most powerful motors in its class, it has the strength to power through 3cm granite.

- ESC-125** **\$232.43**
- 110 VOLT
 - 11.2 Amps
 - Uses 5" Blade
 - Edge Guide

DeFusco
INDUSTRIAL

(800) 289-6834

The **Flex CS40** features a fully integrated durable stainless steel rail system in the saw frame to ensure precise cuts. The removable cutting cart gives you better access to the saw so you can clean up quickly and easily. This is a very good quality for a low cost

- 120 VOLT
- 12 Amps
- Uses 5" Blade
- Edge Guide for Straight Cuts

CS40 **\$189.00**

Pneumatic Wet Saws

The **Alpha PSC-150** is a saw that will cut 3cm stone slabs in one pass, and is capable of miter cutting 2cm. Uses up to a 6" blade. At 90psi it is comparable to a 2 horsepower motor. Another top quality product from **Alpha**.

PSC-150 \$645.00

- Air Pressure: 90 PSI
- Air Consumption: 48 cfm
- No Load rpm: 8,500
- Weight: 10.14lbs.

The 5" **CDT** pneumatic saw runs out at 11,000 rpm. It has safety features including a collar lock and an adjustable exhaust.

PSC-600 \$435.00

The **Alpha PSC-600** is a grinder style saw that will cut 3cm stone slabs in one pass. In addition, it is capable of miter cutting 2cm. Uses up to a 6" blade. At 90psi it is comparable to a 2 horsepower motor. Light like a grinder but it is a saw.

CDT5SAW \$249.90

- Uses 16 cfm
- Weight: 4.2lbs.
- Air Pressure: 90 PSI
- No Load rpm: 11,000

Stone Routers

- Variable Speed: 0-6000 rpm
- 220 Volt Dual Phase Motor
- Internal & External Water Feed
- 20" x 12" x 16"
- Only 44lbs.
- 3hp Motor.

8000 \$4,475.00

The **OMA Taurus DigiSpeed** is the first digital router ever built! This continuous variable speed router is adjustable from 0 to 6000 rpm. This lets you set the speed for optimum rpm of your bits, allowing faster cutting and maximum life for your profile and polishing bits.

It also has the **OMA** safety and shock prevention features and a hydroplaning base to glide over your work. This is a complete unit that includes the power pack. Made with aircraft aluminum and steel, it is made using the latest metallic technology for strength and durability. The outside cover is made with true fiberglass, not cheap plastic. These quality materials produce the lightest weight electric router with the strongest and most solid core in its class.

The **Red Ripper Ultralight™** router is our lightest router yet! Weighing in at only 11 lbs., you can easily pick up this router with one hand! Great for profiling sinks and edges, and is perfect for pre-fabs. The built-in hydroplaning base helps the router move smoothly over the surface of the stone without scratching. Perfect for up to 4cm stone.

- Grinder Motor
- Only 12lbs.
- Hydroplaning Base

015-764 \$1,150.00

The **Weha Rock Dog** is a 9000 rpm single speed router. Made with a unibody aircraft aluminum housing, the **Rock Dog** is a super smooth 9000 rpm profile router that can get the job done fast. With a 2.4hp 230 single phase motor, it can profile up to 6cm. The **Rock Dog** router comes with an aquaplaning base for easy movement across the surface.

- 9,000 rpm
- 230 Volt Motor
- 20" x 12" x 16"
- Only 77lbs.
- 2.4hp Motor.

Routers & Bowl Cutting Machines

The **Oma CP99** hydraulic router has 60% more power than electric units. Italian made, it will give you years of service. Powered by the 4hp hydraulic pump below, this tool has many advantages over traditional electric stone routers:

No electricity to the router - zero chance of electric shock to the operator and no motor vibration. It will not lose power even working on 6cm material. Variable speed 0 - 7,500 rpm. Stock, this tool uses **Oma** router bits, but adapters are available for conventional bits.

8002 \$3,950.00

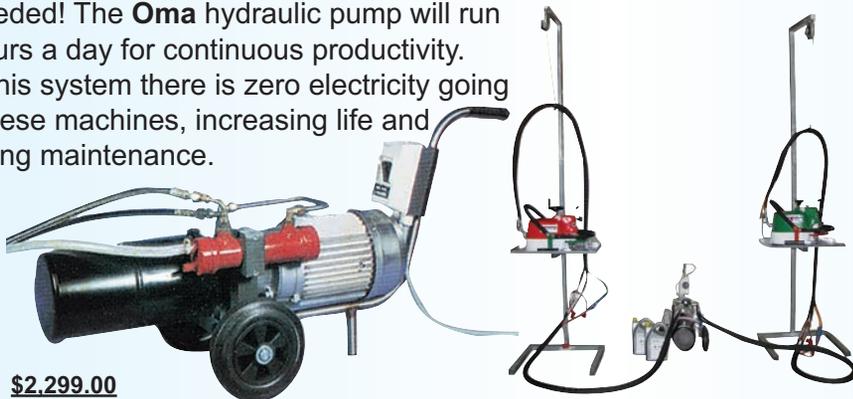

The **Oma Antarex** bowl cutting machine will cut out a sink bowl or vanity bowl quickly on any stone. At 44,000 rpm, it runs at 4 times the speed of radial arm machines. This 4hp bowl cutter uses a 3/8" (10mm) diamond finger bit that requires only 1 pass in 2cm and 3cm stone. The **Oma Antarex** bowl cutting router runs at a solid 4hp, and is completely mobile.

- 44,000 rpm
- 220 Volt Dual Phase Motor
- Dimensions: 20" x 12" x 16"
- Light Weight - Only 35lbs.
- Strong 4hp Motor.

8003 \$4,975.00

The **Oma** hydraulic pump is the engine behind the **CP99** router and the **Antarex** bowl cutter. With a 4hp, 220 volt single phase motor, it will give more power to the machine than will ever be needed! The **Oma** hydraulic pump will run 24 hours a day for continuous productivity. With this system there is zero electricity going into these machines, increasing life and reducing maintenance.

8006 \$2,299.00

The **Oma Hydraulic Bowl & Router Workstation** is the perfect solution for bowl cutting, profiling and polishing edges, and keeping it all organized. It comes with the **Antarex** bowl cutting machine, the

CP99 router, the hydraulic pump with a double connection, two stands with hose pulleys, and all hoses and connections.

This **Oma Bowl and Router system** takes up a very small footprint in a shop. In fact, it can be used in a standard work table space.

OMAHYDWRKSTN \$9,900.00

Seam Phantom®

NSI Solutions Seam Phantom® is an innovative system for producing near perfect seams in all types of stone and quartz. The system utilizes a diamond cup wheel followed by up to three diamond abrasives (60-300 grit) and a precise depth adjustment to eliminate chips and produce a clean sharp edge. The rigid design and Glide Guide straight edge keep each half of the seam straight and true. With this you can produce a nearly invisible seam.

Stone Chiseling Machines & Sink Bull

Stone Pro was the first company to develop an edge chiseling machine for stone. There have been many copies but there is still only one **Beaver**. Available in two sizes - the small will handle up to 1 5/8" (40mm) and the large will handle up to 2 3/4" (70mm). The **Beaver** is a pneumatic tool that chisels perfect inside & outside radius edges & 90° corners. When you compare the time you'll save over doing it by hand, the Beaver will pay for itself! With a Beaver you can edge an entire island in about an hour. These come with a standard 1/4" npt connection and a set of chisels so you can plug it in and use it right away.

- Base Plate is Non-Marring Plastic
- Two Sizes Available
- Uses 3cfm @ 90psi
- Ready to Use

Item #	Size	Price
<u>SPBEAVERS</u>	<u>Sm</u>	<u>\$1,475.00</u>
<u>SPBEAVERL</u>	<u>Lg</u>	<u>\$2,300.00</u>

The **Weha** stone chisel is for fully automatic production of chiseled edges by breaking the slab edge faster. This allows for quicker processing in comparison with the traditional mechanical method. Improved ergonomic construction and design allows for less user fatigue than previous models. This tool is adjustable according to the slab thickness and will create chiseled edges on stone up to 40mm thick.

- 12" x 14" x 11"
- 32lbs
- Uses 4cfm @ 90psi
- Base Plate is Non-Marring Plastic

7264116 \$2,995.00

The **Hydraulic Beaver** is simply the best chisel machine in existence. This machine will not jump like the pneumatic one and has much higher compression strength. The **Hydraulic Beaver** will even chisel laminated quartz. The **Beaver** edges stone extremely quick, while maintaining a natural randomized look. It is made to be precise in its measurements with any stone it encounters. This chisel will handle stone from 20mm - 60mm and comes with a 1/4" npt connection and a set of chisels. This is arguably the best chisel for stone anywhere!

SPBEAVERH \$3,470.00

NSI Solutions has finally provided an affordable, heavy duty, manual sink milling machine specifically designed for grinding under-mount sink cutouts.

The **Sink BULL™** utilizes a simple, rigid, powerful design and inexpensive templates to make sink grinding easy and fast.

The **Sink BULL™** makes CNC quality sink cutouts a simple task for every fabricator using the Rapid Z™ CUT & 1"-3" drums.

Stone Chiseling Machines & Sink BULL

Power Tool Accessories

The Alpha® Filter/Regulator manifold systems help eliminate potential issues caused by rust or contamination in the pipes or connectors feeding pneumatic tools. They also help prevent pressure drops when using a large volume of air. This way the pressure can be set on the tools at 85 PSI, while the main system can run at 125 PSI. The systems, which comes in two sizes (53 CFM & 106 CFM), consist of a Filter/Regulator with a shut off/dump valve, and an aluminum manifold with three or four aluminum quick disconnects. Keep your system clean and get the maximum performance from your pneumatic tools! These are available for two systems sizes. If you have up to 53cfm of air you can run the 1030-0022 which handles up to three tools at once and if you have greater than 53cfm and up to 106cfm you can use the 1030-0023 which handles up to four tools at once.

Item #	Ports	
<u>1030-0022</u>	<u>3</u>	<u>\$293.38</u>

Rail Saw

The **Achilli TSA** portable track saw is a proven work-horse made for everyday use. This saw will cut up to 4cm material in one pass. Track rail beam is extremely rigid and straight, for accurate cuts every time. Saw glides on track with a push of a finger. This saw uses the same metals, parts and design that they use on their full size saws, so you can depend on it!

This saw comes with the cutting head and three rails, a 4', 8' and 13'. This is the last rail saw you will ever buy!

- 3hp 220 V Single Phase Motor
- 1700 rpm - 60hz
- Cutting Depth: Up to 1 1/2"
- 3 Rails Included - 4', 8', 13'
- Accepts: 10", 12", 14" Blade
- Machine Weight: 103lbs.
- 127" Length of Cut

14408 \$3,899.00

Stone Saws & Sink Machine

Beam Saws & Sink Machine

The powerful **Abaco** site saws are ideal for construction sites and work shops. Uses 10", 12", or 14" blades with 1" arbor. The depth of cut will be 2", 3" or 4" or 1", 2" or 3" at a 45 degree miter depending on the blade diameter. These 220 volt 3hp saws are equipped with roller conveyers which make loading easy. They have adjustable stops built in to make exact parallel cuts a simple task. These precision saws are excellent for cutting slabs and their wheels and rollers make for effortless single-handed transportation.

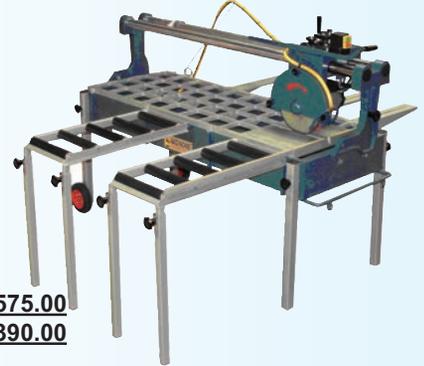

The **Abaco Mod S1 site saw** includes one side table with rollers on it and two support arms with stop guides. This saw will rip up to 45" long cuts. It is a heavy duty saw weighing in at 352 pounds.

The **Abaco Mod S2 site saw** includes two side tables with rollers on it and two support arms with stop guides. This saw will rip up to 61" long cuts. It is a heavy duty saw weighing in at 573lbs.

Stone Saws

The **Achilli TOP** is a multipurpose machine that allows the operator to do different jobs with only one machine with a reduced investment: sink cut-outs, shaping and polishing internal and external contours, drilling and recess drains. All jobs are performed without moving the piece. Although it is a manual machine, it does the same job as a CNC working center. It does not require an experienced operator. Anybody can work with this machine and produce high quality projects after a short training period.

Ideal for a small or new factory minimizing investment, reducing production costs and time to manufacture the finished products. This unit allows you to create complete kitchen and bathroom counter tops. You can also use templates to create your sink cutouts.

The **MRTOPM11Z** is a 3 axis saw with a fixed head that does not rotate or tilt. It has a motorized cutting depth adjustment.

The **MRTOPM21** is a 5 axis machine where the head can be manually rotated in 4 positions 0-90-180-270. It can also be manually tilted from 90° to 0°. This machine is equipped with a cutting package; it can use a blade with diameter of 200mm. With the head at 90° it can polish straight edges using pads. It has a manual cutting depth adjustment.

This unit has many features including:

- Huge Working Area 126"x47"
- Galvanized Steel Frame
- Stainless Steel Slides
- Smooth Movements due to Large Sliding Wheels
- Micrometrical Adjustment by Handwheel
- Pressurized Electrospindle that Guarantees Longevity
- Powerful Motor 4.5hp

<u>MRTOPM11Z</u>	<u>Top Machine</u>	<u>\$34.471.00</u>
<u>MRTOPM21</u>	<u>With Cutting package</u>	<u>\$40.846.00</u>

The **Achilli MSA Monoblock 45 degree Miter saw** is designed to make 45 degree miter cuts on slabs. With a 130" table and a 7.5hp variable speed motor, this unit will make fast work out of your miter cutting. This saw frees up the bridge saw from 45 degree stone cuts. It has a variable speed control and a hot dipped galvanized frame that ensures years and years of life with no rusting or metal fatigue.

The main electrical panel controls feature a main isolator switch, an emergency push button stop, and a power on reset button. The head motion uses linear guides fitted with recirculating ball slides. The head travel (X axis) is 129" with a feed speed from 0-7 meters per minute. This unit is available with pneumatic pop-up slab stops allowing the processing of slab thickness below 10mm.

TECHNICAL SPECIFICATIONS:

Useful cut: 130"
 Overall Dimensions: 171" x 59 x 58"
 Worktable Dimensions: 130" X 39"
 Diamond Blade Diameter: 14",16",18"
 Blade Bore Size: 2"
 Min-Max Stone Thickness: 0."- 3.15"
 Main Motor Power: 5.5Kw 7.5hp 3 Phase
 Main Motor Rotation Speed: 1400 rpm 50Hz-1700 rpm 60Hz
 Main Motor Variable Speed: 700-3400 rpm
 Standard Voltage: 230V-60Hz. 30 Amp Breaker Required
 Dimensions of Installed Machine 14'2" x 74" x 69"
 Weight of Saw: 2039lbs.
 Minimum Miter Width is Material Thickness +14mm (necessary to block the piece under the slab stop)

Features Include:

- Galvanized Steel Frame
- Head Travel on Linear Guides Fitted with Ball Slides
- Motorized Head Travel on X-Axis with Variable Speed
- 10 Pneumatic Pistons to Secure the Workpiece in Place
- Blade Variable Speed for Optimum Cutting
- Equipped with Motorized Hydraulic Pop-Up Rollers
- Equipped with Pneumatic Pop-Up Slab Stops
- Material Thickness 0-80mm
- Blade Angle Adjustment (in/out) 45 +/- 2 degrees

Bridge Saws

The **Achilli MBS IG** is their best-selling bridge saw; the perfect combination of simplicity, flexibility and durability. The installation is easy and does not require a foundation. This machine is equipped with a compressed, rectified and chromed "active beam" guaranteeing the utmost accuracy. The rotation of the head allows it to perform interpolated angle cutting in all directions.

MBS IG is a monoblock bridge saw with CNC axis control unit for cuts programming. Fully customizable according to customer requirements, it features easy installation coupled with the perfect cutting precision guaranteed by the special design of the beam. Manual or automatic head rotation to perform interpolated angle cutting in all directions.

Features:

- Weight: 6100lbs.
- Dimensions: 19'L x 8'6"W x 8'6"H
- 230Volt / 3 Phase 60 Hz 60 amp
- Tilting and Rotating Worktable
- Table Ready to Pour Concrete
- 15hp Motor
- Blade Sizes: 14", 16", 18", 20"
- Laser
- 10" Color Touch Screen on Swivel Arm
- Head Motion: X Axis 135", Y Axis 89", Z Axis 15"
- Manual Head Tilt to 45° by Hand Wheel for Miter Cutting in Both X and Y Axis
- Manual Head Rotation with Push Button Hydraulic Lock (0°-90°-180°-270°)
- Remote Pendant Control with Cable
- Bellows on X Axis to Protect Bridge
- Warranty: 12 Months for Parts

MBSIG \$67,900.00

Includes delivery, installation and training.

The **Achilli MBS Gold** Monoblock bridge saw with automatic head rotation performs straight cuts in all directions. Manual or automatic head tilt from 90° to 0° for tilted and horizontal cutting with special connection for mounting core drills. High precision head motion on linear guides with recirculating ball slides. All the features of the **MBS IG** plus it is capable of fully automatic operation or can be operated in a semi-automatic mode to give the operator full control of sawing operations. Manual or CNC, controlled tilt head from 90 to 0 degrees, 1/2 gas connection for mounting core drills and perform an automatic drilling cycle to easily cut corners and remove the tension from the sintered material plates. Has Pre-loaded parametric figures such as hexagon, octagon, kitchen top, trapezium, polygon, etc. and profiling environment of the CNC to create artistic frames and decorations.

Features:

- Machine Dimensions: 22'L x 9'6"W x 9'6"H
- Weight: 6300lbs.
- 230Volt / 3 Phase 60 Hz 60 Amp
- Tilting and Rotating Worktable
- Table Ready to Pour Concrete
- 10" Color Touch Screen on Swivel Arm
- 360 Degree Head Rotation
- 15hp Motor
- Blade Sizes: 14", 16", 18", 20"
- Laser
- Wireless Pendant Control
- Bellows on X Axis to Protect Bridge
- Head Motion: X Axis 157", Y Axis 92", Z Axis 15"
- Actual Cut Lengths 137", 86", 15"
- Automatic Head Tilt to 90°
- Warranty: 12 Months for Parts

Includes delivery, installation and training.

Maintenance & Repair Kits

Surface Renu is a scratch repair kit for porcelain and UCS materials. Repairs are very easy to make. You do not need to be able to top polish stone to repair surface scratches in porcelain. Each disc will repair approximately 10-15 square feet. The kit comes with 10 grey & 10 black in both, 5" & 3". With this kit, you can make approximately 10 scratch repairs.

SURFRENU **\$319.50**

This **Granite Top Polishing Kit** is a recipe born of the **SFA**. It is almost everything you need to remove a scratch or level a seam. This kit will allow you to grind granite counter seams flat, remove scratches, or make other repairs and blend in with the factory finish. This kit comes with three resin turbo grinding discs, their adapter for use with a polisher, a 1,000 grit **Alpha Ceramica** pad, a two pound tub of **MB-20**, three hogs hair pads and a 5" backer pad. All you have to provide is the polisher and some water!

Use the resin turbo cups to remove the scratch and clean up the stone. Then the 1,000 grit pad will give you some shine and finally buff it with the **MB-20** until you match the factory finish.

**DeFusco

SUPPLY**

TPKIT **\$315.90**

The **Bonastre Marble Polishing Kit** consists of 1 unique 5" flexible rubber backer and five 5" pads, Steps 1-4, and a 5" Bonastre green pad for final finishing. For use with a drill, this kit is perfect for shower touch-ups, corner work and any other quick touch-ups in tricky areas that require some more maneuverability. With the flexible rubber backer you can get these pads almost anywhere.

RENOVA5KIT **\$115.95**

The **Bonastre Marble Polishing Kit** is great for restoring marble. It features a 3" rigid backer that fits in a drill, a thick foam riser, 3" Magic Renova pads 1-4 and a 3" Bonastre green pad for final finishing. The 5 pads are colored coded.

RENOVA3KIT **\$59.95**

The **Deluxe Granite Top Polishing Kit** includes three resin turbo grinding discs, their adapter for use with a polisher, a 1,000 grit, 2,000 grit and 3,000 grit **Alpha Ceramica** pads, a two pound tub of **MB-20**, five hogs hair pads, three white super gloss pads and three backer pads, a 4", 5" & 7". All you have to provide is the polisher and some water!

This is a better solution for someone who is not yet proficient at top polishing granite.

Tile & Beam Saws

Beam Saws

Montolit's F1 Brooklyn series of heavy duty beam saws provides contractors with the perfect balance of power, speed and precision in a durable and compact design. Available in four sizes with different capabilities, one of the **Brooklyn** saws will handle your needs for any tiles and some slab remnants. Each saw is equipped with a DNA (**SCX250**) diamond blade, which is excellent for porcelain. All the products in this line have common characteristics, such as a powerful engine, direct transmission and a light but resistant corrosion proof aluminum frame. All the metal parts of this wet saw are zinc-plated prior to being painted.

All **Brooklyn** saws have 115 volt, 2hp motors. They have a maximum 2" depth of cut and use a 10" blade with a 1" arbor.

- Powerful 115V, 2hp Motor
- Height Adjustable Cutting Head
- Removable ABS Water Pan
- Head Tilts for Diagonal Cuts
- Aluminum Frame with Reinforced Galvanized Steel
- Patented "Squeeze" Tile Locking System to Lock in Tiles During Cutting
- Patented Adjustable Legs System (F1-151 and F1-181 only)
- Supplied with No. SCX250 10" DNA Porcelain Diamond Blade
- 100% Made in Italy

Ring Saws & Tile Profiler

This **Revolution XT Ring Saw** makes precision cutting possible. It uses a 10" sintered diamond blade and is really a cross between a table saw and a band saw. This saw is ideal for cutting curves with precision and extremely smooth cuts. It can cut inside and outside radius curves on any length material, and you can cut up to 6cm thick. This saw has no water pump, it is completely self-contained, and it weighs only 6lbs.

We carry full packages with the stand and a sliding tray as shown.

Available with regular single-sided blade, double-sided blade that can be used forwards and backwards, or with a glass blade for cutting glass.

Machines for Refinishing Floors & Slabs

The **Hyper Grinder UFO** surface refinishing machines are available in the 290 and 330 models. They use 4" & 5 1/2" discs and pads. They can grind, sand, strip, buff, burnish, polish and edge to within 1/8" of the wall. These can outperform the competition's technology on any hard surface – floors, walls, ledges, counter tops, stairs and risers. These variable speed units have a powerful motor and due to the counter-rotating planetary, it is possible to grind and polish marble, granite, and concrete. Complete with a tank, splash guard, hook and loop pad holders and vacuum connection, it doubles as a floor machine.

Item #
HG-UFO290VS **\$3,995.00**
HG-UFO330VS **\$4,100.00**

The **General 13" Mini Top** heavy-duty machine was designed for use on countertops and stairs. It is one of the best machines on the market today. This machine has a cool running, powerful, 1hp or 1.5hp motor and an all-metal triple planetary gearbox that provides precision, balanced, and quiet operation. It comes equipped with a 10-inch short handle, 13-inch driver, safety lever, and 25 ft cord Plug B.

GEN-TOP13 **\$1395.00**

The 17" **Hyper Grinder KR17 Top 3** swing machine with a 3hp motor and Italian clutch package has been designed for heavy duty applications. It is the most powerful mono-rotary cleaning machine in the world. This machine requires no weights and comes standard with the tank, a nylon brush, a pad driver and a new hydraulic handle that locks into any position. This unit can be coupled with the **K1000** chain driven planetary head for grinding floors with diamonds.

HGKR17-HD-TOP3 **\$3,500.00**

The **Hyper Grinder KR17** is a 17" swing machine with a 2.5hp 110-volt motor that requires no weights. It comes with a nylon brush, water tank, pad driver and a new hydraulic handle that locks into any position. It weighs 120lbs. and has been designed for heavy duty applications. Thanks to its great range of available accessories it can solve any problem in the most economical way. When it comes to polishing surfaces it is one of the strongest floor machine in the states today.

HGKR17-HD **\$2,650.00**

The **Achilli LUXA Floor Machine** has a 110 volt single speed 1.5hp motor. It has a shock absorbing ring around the head of the Frankfurt plate, allowing it to perform lippage removal as well as absorb vibration.

- 120lbs.
- 150 rpm
- 17" Plate Included
- 4.8 Gallon WaterTank

PFLUXA43M08 **\$2,875.00**

HG-4K1000C **\$2034.00**

The **Hyper Grinder K1000** is a chain driven planetary head that can convert a swing machine into a three head planetary machine. We recommend using the **KR17 Top 3**. The chain transmission makes it silent, robust and reliable over time. With it you can smooth, grind, and polish in the fastest and most efficient way. You can use this with diamond tools, sandpaper, bush hammer, brushes, and more. The **HG K1000 Chain Planetary** is equipped with three 4 inch or 5 inch heads.

- 29 1/2" Center for Bowl Cutting

140465 \$499.00

The **Weha Work Table** has angle iron open at the top so you put in 2" x 6" lumber as crosspieces. That way you can move them where you need them to support your material and allow you to make your cutouts. It has 4 locking swivel wheels to easily move around in the shop.

- 84" x 27" x 40"
- Inside Width 24"
- Lumber Not Included
- Load Capacity 882lbs.

143370 \$459.00

The **Montolit Table-One** work station is made of steel and aluminum and is perfect for large format tiles and porcelain slabs. This modular support table can be modeled to provide full support for your porcelain or UCS materials. While the table measures 71" x 45", it can accommodate porcelain slabs up to a maximum size of 95" x 60". Used in pairs there is no slab they cannot accommodate.

The crossbars, with anti-scratch rubber inside, can be easily moved sideways and/or slide back and forth as needed, also the height of the worktop is adjustable in three positions to adapt to the height of the installer and the needs of the operation. These breakdown into a package you can easily put behind the seat of the truck.

300-20 \$1,009.00

The **Abaco Fabrication Stands** are heavy duty. These fold easily for carrying from jobsite to jobsite. This item is a set of two of these stands. The height is adjustable from 31.5" - 39.375".

- 25" x 31" - 39"
- Height Adjustable
- Stackable
- 660lbs. Capacity

AFS3139 \$389.00

The **Weha Fabrication Stand** let's you create your own work station. Easy to move around, and can be used throughout the shop in many different areas. At 25" wide, height adjusts from 34" up to 44".

- 25" x 34" - 44"
- Height Adjustable
- Stackable

137235 \$84.00

The **Weha Sink Cut Out Stand** is designed to slide under the sink and vanity cut out to support the cut out from dropping and most importantly from breaking the countertop during the fabrication process.

- 12" x 12" Base and Top
- Height Adjustable 23" - 41 1/4"
- Stackable
- 360lbs. Capacity

138721 \$84.00

The **Weha Rodding Stand** is great for holding your reels of fiberglass and carbon fiber rodding. This reel will hold up to 330' rolls.

It gives you easy access to your rodding material without the roll coming apart and turning your rodding material into a huge mess of spaghetti!

Mechanical Lifters

Material Handling Products

Abaco Little Giant slab lifters have been developed to handle and move a slab of stone without damage. **Abaco** is the #1 slab lifter for many reasons, mostly because they are versatile, safe and secure.

The **Abaco Little Giant Lifters** will help solve the problem where head room is an issue. The **ALG50** can be used with 2cm or 3cm slabs while the **ALG75** is meant for thicker slabs. Available with black or white rubber, all models come with a swivel shackle. These lifters have a working load of 2,860 pounds.

Black Rubber		
Item #	Grip Range	
ALG50	5/8 - 2"	\$629.90
ALG75	1 1/8 - 3"	\$699.90
White Rubber		
Item #	Grip Range	
ALG50-W	5/8 - 2"	\$639.90
ALG75-W	1 1/8 - 3"	\$716.90

The **Abaco Little Giant Automatic Lifters** are fully automatic. Each time you lift up and lift down, the installed automatic locking latch will lock and release the clamping mechanism. This mechanism makes it easier and safer to unload slabs. Comes with a swivel shackle.

Black Rubber		
Item #	Grip Range	
ALG50A	5/8 - 2"	\$739.90

White Rubber		
Item #	Grip Range	
ALG50A-W	5/8 - 2"	\$749.90

The **Abaco Sky Rider** automatic lifter is small but handy. This automatic lifter is operated by a locking latch mechanism. Mostly made from aluminum, it is lightweight and durable. It has a small profile with wide clamp plates to secure the slab against breakage. This clamp can be used on material from 0-30mm and has a capacity of 1,100lbs.

- Length 19"
- Width 6"
- Height 13"
- Weight 57lbs.
- Grip Range 0 - 30mm"
- 1,100lbs. Capacity

Item #	Rubber	
ASL30A-B	Black	\$719.90
ASL30A-W	Black	\$739.90

The **Abaco Porcelain Lifter** is designed for moving porcelain slabs from 4mm - 20mm in thickness. With its fully-automated jaws clamping on both sides it requires minimal labor. Also good for Lapitec and other UCS.

- Length 30"
- Width 10"
- Height 22 1/4"
- Weight 51lbs.
- Grip Range 3/16 - 13/16"

GL28	\$808.00
-------------	-----------------

The **Rock Jockey's** purpose is to minimize personnel need for moving slabs safely. Made in the U.S.A., the **Rock Jockey** makes it so one person can move slabs with a lift truck and boom. Made for the **Abaco** automatic lifters above, this product also reduces the opportunity for injury or death caused by the current method. The cost of an injury is huge; the potential for OSHA fines or even closing down your operation is real.

- Remote Control
- 360 degree turn capability
- Built in Clutch
- Weatherproof

SPRJ 3,936.00

The **Arcturus** cable lifter is for slabs from 3/4" to 4". It comes with a clamp plate for edging slabs; when using the clamp plate the load rating is reduced by 660lbs.

Vacuum Lifters

The **Weha EP800** unipad vacuum lifter may be used with its hand pump or with an air compressor that operates at a min 4cfm @ 60 PSI. The hand pump only requires about 10-15 pumps to build pressure into the tank. Engage the vacuum to start building suction. Another 10 or so pumps and a full vacuum is achieved. This vacuum lifter has been used with tremendous success on slabs, landscape materials, sheet metal, and other sheet goods.

- Horizontal Capacity 1,764lbs.
- Vertical Capacity 882lbs.
- Suction Plate 28" x 12"
- Weight 73lbs.

118674 \$2,750.00

The **Weha A1500** 5 Pad vacuum lifter can be set up to use 1,2,3 4 or all 5 of its pads. Each pad has a 300lbs. capacity, so when using all 5 this lifter has a 1,500lbs. lift capacity in vertical or horizontal position. Since each is mounted on a swivel it can be used in different positions, making your job easier. This German made lifter will last for 20+ years. It requires a minimum of 58 PSI at 4 CFM or 4 bar 5.

- Max Spread 104" x 58"
- Min Spread 36" x 39"
- Individual Shutoff Valves
- Control Lever Power Tilt
- Weight 203lbs.

138514 \$6,399.00

Carry Clamps

Grabo incorporates multiple patents and technological innovations to bring you the first battery operated hand vacuum cup! **Grabo's** unique seal allows the tool to adhere to rough, smooth or even wet surfaces. You can use this on the front or back of a slab. Kit includes **Grabo**, two batteries, charger and extra seal in a storage bag.

- Built in Vacuum Gauge
- Lifting Capacity 375lbs.
- Storage Bag Included
- 11.7" x 8.3" x 4.3"

GRABO \$249.00

We stock extra batteries and extra foam rubber seals for the **Grabo**. Just in case you need them.

GRABOBAT \$49.00

GRABOSEAL \$19.00

The **Omni Cubed Stealth Grip™** is a non-marking vacuum cup that provides a reliable and convenient hand-hold on stone, tiles, and glass. These are made of a proprietary rubber that is not only non-marking but also retains necessary durability such as UV, weather, and tear resistance. The cups also feature their FTS™ (Flexible Triple Seal) technology that locks-in vacuum and provides optimum hold, even on textured materials. Sold in pairs with a convenient storage bucket.

SGB-147-19 \$195.00

From **Abaco**, these handheld vacuum cups for lifting stone features an 8" vacuum pad and a light-weight ABS pump and handle. It has a horizontal lifting capacity of 176lbs. This lifter comes in its own case.

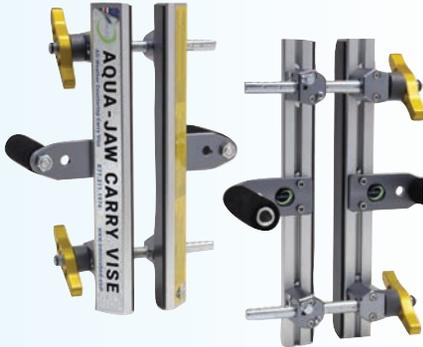

- 8" Diameter
- Max Cap 176lbs.
- Weight 1.7lbs.
- Storage Case Included

Item # **VC200P \$79.90**

Carry Clamps

The **Omni Cubed Aqua-Jaw™ Carry Vise™** is designed to not slip off wet stone, and its super-strong vise action allows carrying stone up stairs and other challenging terrains. At 800lbs. per pair they have the highest capacity on the market. The clamps open wide (to 4.25") for thick edges and miters, and have an optional handle kit which allows four people to share the load of heavy stone.

AJ-128-15 \$595.00

The **Aqua-Jaw™ Handle Kit** accessory adds two more handles to each unit, enabling four people to share the load.

AJ-128-HK-15 \$60.00

Abaco Single Handed Carry Clamps have a capacity of 220lbs. and a grip range of 0-1" Sold as a set of two. Vulcanized rubber pads add grip and prevent damage to your materials.

SHC25 \$179.90

Abaco Double Handed Carry Clamps have a capacity of 220lbs. and a range of 0 to 1 11/16". Sold as a set of two. Also vulcanized rubber. Heavier stone requires two hands, and these will accommodate 3cm stone.

ACC440 \$289.90

The **Omni Cubed Mega-Jaw™** carry clamps feature strong, lightweight aluminum arms and durable, non-marking rubber gripping pads. Mega-Jaws open wide (to 2.4") and can accommodate up to 500lbs. per pair. Sold as a pair.

MJ-126-15 \$295.90

Material Handling Products

Manual Lifters

The **Omni Cubed Rigid Cross-Brace Kit™** attaches to any two Omni Cubed® vacuum cup Sink Hole Savers, forming a sturdy support frame for large format slabs and tiles, large islands, or fragile cutouts such as tub decks. The clamps rigidly attach the cross-bars perpendicular to the Sink Hole Saver™ rails, allowing customized configurations to suit a variety of applications. The 3' kit includes two 3' strengthening bars, four rigid clamps, and a convenient carrying bag while the 5' kit has two 5' bars, six clamps, and a carrying bag.

- Pays for Itself with the First Save
- Ideal for Porcelain and UCS
- Minimizes Twisting and Flexing
- Integrated Non-Scratching Feet

Porcelain Handling Tools

The **Montolit SuperStick** is designed for handling and positioning large format porcelain slabs. The overall dimensions of the complete frame are designed to allow the removal of the tile slabs from the special packaging crates which carry them. Made of galvanized steel to resist wear and corrosion, the **SuperStick** enables movement of the tile slabs in both horizontal and vertical positions. The telescopic handles allow a more ergonomic grip and the carrying frame is equipped with telescopic feet to allow support on the ground so that the tile is held in the frame without being damaged. For full slabs we recommend two additional suction cups to prevent accidental damage to the slabs.

- Quick-Release Vacuum Valves
- Perfect for Material Up to 12mm
- Four 8" Suction Cups Included
- Maximum Load 176lbs.

300-70SL **\$1,975.71**

The **Montolit FlashLine** cutting system is for cutting gauged porcelain tiles and slabs up to 10mm thick. It will score and cut tiles up to 134" long. The **FlashLine** uses 3 aluminum quick connect extensions as a cutting guide. This is accomplished by utilizing a patented non-skid system on the underside of each extension allowing for the greatest precision when cutting. This unit makes it easy to make straight cuts on a slab of thin porcelain quickly and without a saw.

The No. 240T Titanium Carbide Scoring Wheel is 7.5 mm in diameter which allows a perfect score on the tile surfaces (especially textured tiles) leading to a perfect cut. Very easy scoring wheel change without tools.

- Titanium Scoring Wheel
- Integrated Lubrication System
- Breaks Down for Storage
- Precise Scoring Head
- Storage Bag Included

FL3 **\$720.00**

This is the **Montolit pump suction cup** for the Superstick. If you have the Superstick and want to lift full size slabs two additional suction cups are necessary.

300-71SL **\$328.72**

The **Montolit Battile** vibrating suction cup has two purposes: It can be used as a hand vacuum clamp with a 55lbs. capacity, and it doubles as a vibrator to remove air from glued tiles right after installation! To use it as a suction cup simply place it on the tile to be laid and squeeze the suction lever. It will hold as long as you do. As a vibrator place it against the material and depress the "Dead-Man" style vibration switch. Slide over the surface of the tile while using a rotary motion from the inside towards the outside of the tile to facilitate the outflow of air under the tile.

- Quick-Release Vacuum Valves
- Vibration is Adjustable
- Built in 8.4V Li-On Battery
- Maximum Load 55lbs.

BATTLE **\$295.51**

The **Montolit Battile Pro** is powered by a 16 volt lithium-ion battery and can be used for indoor and outdoor installation. It helps to avoid problems due to the incorrect distribution of the adhesive under tiles and big slabs. It also allows the positioning of the tile through the suction cup (55lbs. capacity). This is a much more powerful tool than the Battile and the charge life is also longer. This vibrating tool comes with a bottom plate which makes it easier and faster to vibrate full slabs.

The intensity of the vibration is adjustable to three different frequencies from 5,000 - 12,000 rpm. The soft-touch inserts on the handle make the grip ergonomically comfortable and safe.

- Quick-Release Vacuum Valves
- Vibration is Adjustable
- Built in 16V Li-On Battery
- Maximum Load 55lbs.

Sink Savers

The **Omni Cubed Sink Hole Saver™ Auto** is a surface-mounted, vacuum-pump powered reinforcement system that strengthens fragile materials during lifting, transportation, and installation. Featuring proprietary, 6" non-marking vacuum cups with triple sealing rings for a strong, reliable hold, even on textured and leathered surfaces. It has a stronger vacuum pump with greater airflow rate than previous models. The pump runs on a 12V Li-On battery that lasts up to 5 hours on a single charge, with an LCD display showing the remaining power level, so you never have to wonder if your battery will last through another install. Quick-release valves make product removal fast and easy, and new knurled lock-knobs allow quick repositioning of cups around cutouts. Available in two lengths, with two optional accessories (**Angle Bracket** and **Vertical Lifting Handle Kit**), to provide a protection solution for any situation.

Item #	Length

The **Omni Cubed Sink Hole Saver™ Manual** is a surface-mounted reinforcement system to strengthen fragile materials during transportation and installation. This product features 6" non-marking vacuum cups with triple sealing rings for a strong, reliable hold, even on textured surfaces. Vacuum cups can be re-pumped in place without loss of remaining suction, and red-collar indicators on thumb pumps allow vacuum pressure to be monitored at a glance. New knurled lock-knobs allow quick repositioning of cups around cutouts. Available in two lengths, with three optional accessories (**Angle Bracket**, **Vertical Lifting Handle Kit**, and **Extension Bracket Kit**), to provide a protection solution for any situation.

One complete clamp assembly for any model Lam-Clamp.

CLAMP-LC \$33.50

The **Omni Cubed Original Miter-It™** is an easy-to-use jig that allows finished-side-up miter laminations. The clamp offers coarse and fine adjustment. It securely holds drop-down edges at 90°. The heavy-duty steel design features a powder-coat finish and accommodates edges from 1.5" - 6".

MTR-144 \$195.00

The **Omni Cubed Miter-It™ Corner** makes it easy to line up corner miters where three mitered edges come together. The clamp offers coarse and fine adjustment settings for achieving exact seams. This jig makes outside mitered corners easy.

Miter Clamps

The **Omni Cubed Single Miter-It™ Auto Clamp**, If purchased alone, this item requires the use of an **Omni Cubed** vacuum manifold system (sold separately). The user-friendly clamps securely hold heavy, drop-down edges at 90°. The coarse adjustment lever quickly raises apron into place, while the horizontal and vertical fine-tuning knobs provide ultimate control over the seam. It accommodates edges up to 12" tall and 3 cm thick. Typically, one every 3 to 4 feet is sufficient, but more may be used for extra-long or heavy aprons.

MTR-153 \$360.00

- Two Miter Clamps
- 5" Diameter Cups
- Non-Marking Rubber
- 10 Port Vacuum Generator
- Add Up to 8 More Miter-It Clamps

MTR-153E \$1,095.00

The **Omni Cubed Miter-It™ Auto Pneumatic** system uses a highly efficient Venturi Vacuum that requires only ½ CFM of air to provide a hold for up to 10 vacuum cups simultaneously. The proprietary, non-marking vacuum cups provide an exceptional hold on textured and porous surfaces.

- Two Miter Clamps
- 5" Diameter Cups
- Non-Marking Rubber
- 10 Port Vacuum Generator
- Add Up to 8 More Miter-It Clamps

MTR-153P \$895.00

The **Omni Cubed Miter-It™ Auto Electric** system uses a powerful, compact vacuum pump that runs on AC or battery power. The proprietary, non-marking vacuum cups provide an exceptional hold on textured and porous surfaces. Save time and money by eliminating the need for a helper—wherever you would need a hand to hold the material, put a Miter-It™ Auto clamp there instead!

Carts & Dollies

The **Omni Cubed Pro-Lift Automatic** provides a safer means to move stone. Designed to reduce physical strain and risk of injury, the cart can handle 1,000lbs. Use it to safely lower, lift, and roll large pieces around the shop and install location, as well as to assist with final installation. The power lift feature elevates stone up to 45" from ground to support rail, and enables controlled tilting for easier installs. It features a strong aluminum frame, weighs 74 pounds, battery operated, and wireless remote. Comes with an integrated level, stone clamp, 10" non-marking tires and kickbrake for added safety. Use with the **Aqua-Jaw™**, **Carry Vise™** and a **Sink Hole Saver™** for the ultimate installation kit!

- 1,000lbs. Capacity
- Clamp Opening 4.5"
- 10" Non-Marking Tires
- Weight 74lbs.

PLA-140 \$4,995.00

**DeFusco
INDUSTRIAL
SUPPLY**

(800) 289-6834

The **Abaco EZ-Pro Winch Cart** is for safely raising, loading, and unloading finished works with minimal labor. It is constructed so the vertical channel can be raised and lowered by an electric winch. The movement is done with a wireless remote control. This unit is operated by two 14.4 volt rechargeable batteries.

With four solid tires and a locking brake plus a steel body, this unit has added stability. It will raise a slab from 6" to 40" off the ground for easy transfers to a truck A-frame or from the install vehicle to the installation site. With a 990lbs. capacity it will lift the largest slabs.

The hand brake of this cart is located on the base away from the pieces being handled for safety. A rubber lined channel can accommodate up to 2-3/4" thick pieces.

- 990lbs. Capacity
- Clamp Opening 2.75"
- 10" Non-Marking Tires
- Weight 112lbs.
- Wireless Remote

AEWC450-W \$3,072.00

Carts & Dollies

- 48" x 42" x 46"
- 2 Fixed Wheels
- 2 Locking Swivel Wheels
- Max Cap 3,086lbs.

8010143 \$1,402.50

The design of the **Weha Cut Stone Trolley** allows a back-friendly placement of workpieces. By tilting the side adjustable strut you can store shorter pieces. The pull bar is hooked in upright when not in use and is therefore not in the way. This cart is great for moving pieces in the shop.

The **Weha Install Buggy** is great for moving pieces around. Compact, easy to move, has 2,000lbs. capacity and 10mm thick protective rubber on the bottom and back to help prevent scratches. With two back 10" pneumatic wheels and two 5" swivel casters with brake locks it is easy to maneuver.

142613 \$420.00

- 40" x 24" x 45"
- 35" Height
- Max Cap 2,000lbs.
- Weight 96lbs.

The **Omni Cubed Pro-Cart AT2** super duty all terrain cart is like the AT1 model, with several convenient and helpful additions: It has collapsible clamp uprights for easy removal and tilting of stone, 10" tires and an adjustable wheelbase which can be tailored to match variable stair treads. The included folding kit enables the caster rails to be rotated beneath the support beam for easy storage.

- Great for Rough Terrain
- Max Cap 1,000lbs.
- Weighs Less than 65lbs.

PCAT2-14 \$1,195.00

The **Omni Cubed Pro-Cart AT1** heavy duty all terrain cart is designed to overcome the challenges of moving stone over curbs, stairs, and other rough terrain such as gravel or lawns. Integrated clamps and high ground clearance allow popping wheelies or climbing stairs with stone attached. The cart has 8" non-marking, flat-free tires and strong aluminum tubing for strength and durability. Included folding kit collapses cart to under 13" wide.

- Great for Rough Terrain
- Max Cap 750lbs.
- Weighs Less than 50lbs.

PCAT1-14 \$775.00

The **Multi-Top Accessory** enables transportation of multiple counter tops simultaneously on Omni Cubed Pro-Carts. Each set includes two upright support rails (two used per cart). They measure 28" in height and have a 750lbs. load capacity.

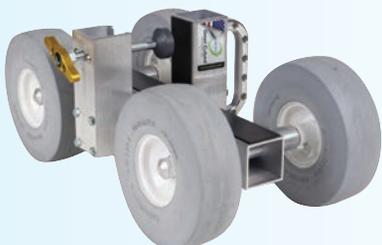

PCAT1-MTA \$185.00

The **Pro-Cart AT1 Folding Kit** is an upgrade accessory that allows the cart casters to be rotated under the main support rail, allowing for even easier storage (reduces cart width to less than 10" wide). Kit measures 6" x 6" x 4".

PCAT1-FK-14 \$80.00

The **Omni Cubed Pro-Dolly™ HD1 and HD2** allow easier transport and installation of counter tops. An aluminum frame makes them compact and lightweight, yet strong enough for heavy loads. Their profile allows more clearance through doorways. They are often used in pairs to handle extra large pieces (this doubles the capacity). Integrated clamps hold counter tops securely on the dolly, so the dolly can stay attached from fabrication shop to final placement. They feature non-marking tires, excellent shock absorption, and a rubber-lined support rail to prevent damage to stone.

- Clamp Opening 5.13"
- 10" Non-Marking Tires
- 1,000lbs. Capacity
- Weight 35lbs.

PDHD2 \$650.00

- Clamp Opening 2.88"
- 8" Non-Marking Tires
- 750lbs. Capacity
- Weight 21lbs.

Material Handling Products

The **Gulf Wave Sea Bass Slab Dolly** has 10" Duraflex Cushion rubber wheels. It is ideal for moving pieces of slab or sheets of glass. The channel is fully lined with rubber to protect and help hold the material.

Gulf Wave products are made in the USA!

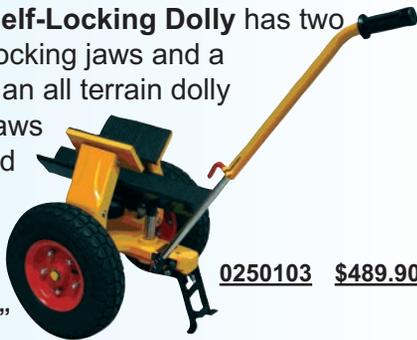

- 18" x 10 1/2" x 10"
- 4" Channel Width
- Max Cap 1,000lbs.
- Weight 25lbs.

GWSB-10 \$159.00

This **Abaco M3 Self-Locking Dolly** has two pneumatic tires, locking jaws and a kickstand. This is an all terrain dolly with self locking jaws and activation load of only 35lbs.

- 34" x 22" x 25"
- Weight 64lbs.
- Max Cap 880lbs.
- Grip Range 3/8" - 4"

0250103 \$489.90

The **Abaco 8" Slab Dolly** has two 8" solid rubber tires. It is good for uneven surfaces. Lightweight at 19lbs. but heavy duty.

0230100 \$149.90

- 20" x 10" x 8"
- 3 1/8" Channel Width
- Max Cap 660lbs.
- Weight 19lbs.

The **Abaco 4 Wheel Slab Dolly** has two 8" solid rubber tires and two casters. With a 3 1/8" channel width it is very stable.

0230103 \$189.90

- 20" x 10" x 8"
- 3 1/8" Channel Width
- Max Cap 880lbs.
- Weight 27lbs.

The **Weha Universal Stone Buggy** is a great in-shop cart for storing tops, remnants and back splashes. Made of heavy steel tubing, with powder coated surfaces. It has two pneumatic and two locking casters that are placed outside the frame for better stability. With replaceable rubber coated uprights, it comes with six removable, rubber coated steel tube stops with four height adjustment shelves built into the frame. This allows for multilevel storage. Excellent for back splashes! Easily store a complete job: counter top on the bottom, back splashes on top!

- Max Cap 1,105lbs.

Carts

This **Weha** drywall and fabrication shop cart is a welded cart for greater stability. We have this painted one that is a little more economical compared to the welded galvanized version. It still has the larger deck and will hold a ton of weight, but it costs less to build and we sell it for less.

- 48" x 28 x 49"
- 14" x 44" Surface Deck
- 2,000lbs. Capacity
- 2 Swivel Wheels
- 2 Fixed Wheels

145499 **\$265.00**

Weha Welded shop cart is made of welded and hot dipped galvanized steel for years of use. It has a 2000lbs. capacity and comes with two fixed and two swivel wheels.

The real advantage is the longevity. Typical painted carts last only a couple of years, but this cart will last 5+ years before needing to be replaced. The upfront cost is more.

However, it will save you 50%-100% in 5 years by not having to buy one or two additional carts.

- 48" x 28 x 49"
 - 14" x 44" Surface Deck
 - 2,000lbs. Capacity
 - 2 Swivel Wheels
 - 2 Locking Wheels
- 145501** **\$355.00**

This **Weha** drywall and fabrication shop cart is a bolt together unit that comes broken down. We have this painted one that is a little more economical compared to the welded galvanized version. It still has the larger deck and will hold a ton of weight, but it costs less to build and we sell it for less.

- 48" x 28 x 49"
- 14" x 44" Surface Deck
- 2,000lbs. Capacity
- 2 Swivel Wheels
- 2 Fixed Wheels

145500 **\$232.00**

This **Weha** fabrication shop cart is hot dipped galvanized for years of use. This cart is bolted together so it can be broken down. It will come broken down to you.

- 48" x 28 x 49"
- 14" x 44" Surface Deck
- 2,000lbs. Capacity
- 2 Swivel and 2 Fixed Wheels

145502 **\$285.00**

Gulf Wave Eel Cart is great for a shop. It's small, it's sleek – you'll be "Shocked" by its performance! This cart will "Electrify" you! This shop cart can handle up to 2,400lbs. yet it's small enough to fit into small spaces making it easy to move materials around the shop or at the job site. Thanks to sturdy construction, an electrostatic powder coating, and replaceable casters.

This cart will last a lifetime. Made in the USA!

GWC-E1244S **\$344.00**

Gulf Wave Eel Cart Deluxe is completely welded, unitized tubular steel frame. No cart frame assembly required! Electrostatic powder coated and can handle up to 2,400lbs. It has Four 8" Hi-Tech Swivel Casters, two that lock.

Heavy-duty compression fit upright protectors and industrial strength rubber protectant pad for cart pan come installed!

Made in the USA!

- 22" x 44 x 47" Overall
- 12" x 44" Platform
- 58lbs.
- 4 Swivel 8" casters
- 2,400lbs. Capacity

Water Filtration

The **Abaco Dehydrator** is a dehydration system for the collection and trapping of the abrasive mud produced by machining and finishing stone.

This filtration unit is an economical, one step method of separating and dewatering sludges and slurries. It is constructed of stainless steel and consists of four basic components: pump, mud holding tank, clean water tray and filter bags. It has no moving parts, requires minimal labor, and is very economical to use. Since it is made of stainless steel, it requires extremely low maintenance.

- 96" x 98" x 21"
- 230 Volt
- Mud Tank Cap 550 ltr
- Weight 617lbs.

Item #	Type	
<u>DEH100</u>	<u>Dehydrator</u>	<u>\$5,995.00</u>
<u>DEH-002</u>	<u>Replacement Bag</u>	<u>\$4.99</u>

Filter Project of Italy also has a **Dehydrator** unit. This dehydration system works much the same as the one above and is also made of stainless steel. The 5 bag system has no moving parts, require minimal labor, and are very economical to use. Since they are made of stainless steel, it requires extremely low maintenance. The biggest difference is this unit is made in Italy of Italian parts.

- 103" x 79" x 20"
- 220 Volt
- Sludge Water Cap 95 Gallons
- Weight 308lbs.

Item #	Type	
<u>TEC703</u>	<u>Dehydrator</u>	<u>\$5,995.00</u>
<u>7240032</u>	<u>Replacement Bag</u>	<u>\$4.99</u>

Air Filtration

The **Filter Project Wet Dust Collection Booths** are water wall dust collectors made to trap over 90% of dust from stone cutting, and other airborne particles. These all aluminum, heavy duty, wet dust collectors help you to meet all the new requirements for removing silica dust from the air.

The operation of the **Water Wall Dust Collector** is extremely simple. Simply push the button and work in front of it. The dust will be vacuumed horizontally into the water wall without the fabricator breathing any of the dust.

Water is held into the collection booth. When turned on the water circulates and creates a waterfall from the top of the unit down to the collection tray at the bottom. Very powerful motors of the water dust collector creates a strong vacuum that pulls the dust particles horizontally from the work bench directly into the water which catches the dust. The dust is then collected in the catch basin at the bottom of the water dust collection booth. Every couple of weeks to a month, simply empty the mud that has been collected in the bottom of the catch basin.

The **Filter Project Water Wall** dust collection booth comes with a 3 ft (1 meter) extension enclosure that provides additional dust control and great vacuum efficiency. 6 ft (2 meter) extension enclosures are available as options.

Item #	Type	
<u>TEC710</u>	<u>6' Booth</u>	<u>\$13,280.00</u>
<u>TEC711</u>	<u>10' Booth</u>	<u>\$14,720.00</u>
<u>TEC712</u>	<u>13' Booth</u>	<u>\$16,550.00</u>

- 220 Volt 3 Phase
- 30 Amp Breaker
- We Offer Financing on these Units.

Air Filtration

The **Filter Project Dry Dust Collection Booths** are made to trap 99.99% of dust from granite, marble, engineered stone, quartz, quartzite, and other airborne particles. These units will help you to meet all the codes regarding silica in your shop. They are available in three lengths, 6', 10' and 13' (they are really 2,3 and 4 meters, but we will call them 6', 10' and 13' here in the U.S.A.).

These booths are all stainless steel, heavy duty and made in Italy. With the additional requirements initiated by OSHA for Silica in the granite and engineered stone, the **Filter Project Clean Air Dry Dust Collection Booths** will be a major advantage in removing silica dust from the air.

The operation of these dust collectors is extremely simple. Simply push the button and work in front of it. The dust will be vacuumed horizontally into the dry dust collector without the fabricator breathing any of it.

The **Filter Project Dry Dust Collectors** have specially designed cloth filtering sleeves inside them. When turned on the very powerful motors create a strong vacuum that pulls the dust particles horizontally from the work bench directly into the dust suction wall, then pulls it down to the bottom of the wall and inside the unit. There the many cloth filtering sleeves trap the dust and only allows 99.99% clean air to come out of the top. The dust is then collected in the catch basin draw at the bottom of the dry dust collection booth. Every day or once a week simply empty the dust that has been collected in the bottom of the catch basin.

The **Filter Project Dry Dust Collection Booth** comes with a 3 ft extension enclosure that provides additional dust control and greater vacuum efficiency. 6 ft extension enclosures are available as options.

Dry dust collectors in automatic self clean mode: a self-cleaning system with compressed air, made by a pressurized tank, and a series of membrane electrovalves with specific blowing tubes inside the cloth filter sleeves and controlled by an automatic sequencer. That means that the unit is self cleaning.

Dry dust collectors in manual clean mode: This unit offers all the same dust extraction services as the automatic dust collector but the cloth filter sleeves will be cleaned by a worker.

- 220 Volt 3 Phase
- 30 Amp Breaker
- We Offer Financing on these Units.

Air Filtration

Air Filtration

Air Filtration & Material Handling Products

Z20 \$2,187.50

The **Zoom series Z20 HEPA** dust extractors are equipped with tested and certified HEPA filters that trap the most dangerous-to-breathe dust particles and prevent them from being released in the air.

A HEPA dust extractor exhausts perfectly clean air and it is far more effective for the fast recovery of bulk dry debris and other building materials found on every job site. The **Z20** hepa vacuum runs on 2 motors at 120 volts, 3.2 horsepower, and 16 amps. The HEPA vacuum will use an air flow 236cfm and has a water-lift of 100 inches. That is enough airflow for you to put a splitter on the end of the 30' hose that comes with it and easily run two tools at the same time. This is an industrial unit.

The machines are designed to clean the construction area and can be connected to powered hand tools, such as small/medium size grinders. This unit weighs 119lbs. The **Z20** features a heavy-duty metal body. Pull-up and Push-down for inlet block and unblock - you don't need a cap anymore. It has separate on/off switch for each motor on this model. It also has easy access to parts for maintenance and replacement.

The **Metabo** HEPA wet/dry vacuum is compact and powerful. Especially suited for extracting concrete and rock dust, this 11 amp, 11,400 watt unit has an air output up to 130 CFM. It has 1333 square inches of filter surface and a 9 gallon container. Power socket for a power tool using the start-up/shut-down feature. All of the dust shrouds we carry may be used with this vacuum.

ASR35 \$799.90

The **Power Wedge** makes clamping easier and safer. It also decreases the likelihood of employee injuries, and helps move slabs more efficiently by increasing the distance between them.

- 10" x 2 1/2"
- Separates the Slab by up to 2 3/4"
- Hard Plastic - Won't Deform

PWEDGE \$22.90

The **Weha Double Suction Cups** are excellent light weight cups that have a 176lbs. weight capacity for moving cut and finished pieces of stone, tile, and glass. They feature 5" cups and only weigh 1.4lbs.

8010423 \$34.90

The **SlabGuard** is a bumper for storing or moving slabs. Place them on the edge of the slab and it keeps the slab from reaching the floor. Your installers will love it since they can bring pieces right to the floor and it will hit the floor first. This eliminates jockeying your hands when putting down the back edge of your pieces. The **SlabGuard** helps prevent the edge of the slab from marring surfaces it would come into contact with when transporting the slab, like when going up a wooden staircase. It can be used for storing or displaying full or partial slabs. The treads on the bottom will grip a solid surface.

- 10" Length for Stability
- Available for 2cm or 3cm Stone
- Rubber Body Will Not Crack or Break
- Retention Clamps to Reinforce Grip

Item #	Size	
SGC2CM	for 2cm	\$29.90
SGC3CM	for 3cm	\$39.90

The **Weha Waste Bin** is suitable for any fork-lift truck. Once this bin is full, pick up from the top with the forklift, lift it over the dumpster and pull the side lever. The bottom of the container will open up to empty the waste from the bottom.

- 46" x 44" x 37.5"
- 24" Depth
- Weight 348lbs.
